

**MORE TONNAGE, MORE GRAIN
MORE LEAVES—TRIO WORKS
ON SILAGE, TOO**

Harlin Watson, Edgerton, Wisconsin, has one of the top producing dairy herds in his state.

Here's his system for making 12 acres provide silage year 'round for 50 milk cows . . . a Funk's-G High Capacity Hybrid, thicker planting, and higher fertility!

The qualities he looks for in a silage hybrid are standability, tonnage, lots of well dented grain, leafy and sweet stalks.
