

Find Out How Much MORE MILK Your Cows Can Give PROFITABLY

The new Wayne "More for Your Money" Concept of Dairy feeding can show you the way. Science has proved that there's a correct balance between body weight, feeding and milk production. The Wayne Concept helps you strike the balance that produces the maximum yield you may not be getting now.

Lead Into Production

You ask your cows how much they should be fed. Lead them into peak production rather than letting their present production tell you how much to feed. Feed FOR production rather than TO production. High level grain feeding is profitable as shown by a summary of DHIA records from Michigan. Let us show you how to apply the new Wayne Concept to cows already in their lactation period . . . how to use it in conjunction with a silage ration . . . how to balance grain mixture use with greater production. Stop in soon.

December 13, 1965
Calf receipts of 107 head sold steady with Choice and Prime bringing 33-35; Good and Low Choice, 30-32.50; Standard, 28-30; Common, 20-26.

Decorate House for Safety
The Christmas tree stays more attractive if you stand it in water outdoors as soon as you bring it home. This water treatment also makes the tree safer because it won't dry out so rapidly.

When you bring the tree into the house, use a water-tight container containing tree stand and see that there's always water in the container.

Use only flameproof and fireproof decorations.
