

● **DHIA**

(Continued from Page 5) Victor Plastow, DHIA advisor, said that every year the county herds are getting a little closer to the goal of 500 pounds fat average. This year's average of 486 pounds

state total, he said.

IF YOU PLANT CORN

YOU'LL WANT THIS

Ortho Unipel Starter Fertilizer 13-34-10

- Easy to handle in 50 lb. bags . . .
- Proven performance . . .
- Highest available analysis . . .
- Convenient to store and use . . .
- Most uniform pellet . . .
- Uniform early response . . .
- Higher yields

Also available in bags or bulk
20-10-10, 16-16-16, 10-20-20

represented a gain of four pounds over the preceding testing year. Pounds of milk showed an increase of 128, while return over feed costs increased by \$28 per cow.

President Dum introduced the new area directors to the group. They were: Raymond W. Burkholder, District 1; Melvin L. Groff, Dist. 4; John J. Herr, Dist. 7; J. Eby Hostetter, Dist. 10; Daniel Martin, Dist. 13; and Allen K. Risser, Dist. 15.

● **Farm and Home**

(Continued from Page 1) Willow Street R2, with a progress report on the Foundation made by Larry H. Skromme, chairman of the special gifts division of the campaign. A report from the building committee chairman Jacob K. Kurtz will outline the architect's progress to date.

All local folks are urged to attend this dinner meeting to learn more about the real contribution of a Farm & Home Center, and to give continued support to this important Lancaster County project.

Tickets are available from any Board member, from the campaign headquarters in the

Farm Credit Bldg., 379 W. Roseville Rd., Lancaster, or from the County extension office in the Post Office Bldg., Lancaster. Noon Monday is the deadline for dinner reservations.

FARM MECH. COURSE

The Farm Mechanization Course being conducted at the Vocational Agriculture De-

partment of Garden Spot High School, New Holland will meet Tuesday, January 25, at 7:29 p.m. to discuss "Mechanical Hay-handling Methods." Mr. Ralph O'Donnell, Product Manager, New Holland Machine Company, will illustrate and present the economics of several hay-handling pieces of equipment.

KETOSIS TREATMENTS

AVAILABLE IN LIQUID or PELLETS

AGWAY KETOSIS TREATMENT —

This is a feed grade propylene glycol. Ketosis is a metabolic disease of high producing dairy cows which has plagued dairymen for many years. Most dairy scientists agree that primary ketosis is caused by an acute glucose deficiency. Because propylene glycol when taken into the body is a ready source of glucose, it acts by helping to make up this deficiency. Propylene glycol is used in Agway's Ket-A-Way feed for prevention of ketosis, but there is a real need for propylene glycol in liquid form for either prevention or treatment of the early stages of ketosis. Agway Ketosis Treatment will be available in one-gallon plastic bottles and in 55-gallon drums on special order.

AGWAY KET-A-WAY

Agway Ket-A-Way is an all-pelleted, high energy feed that has been found to be the most effective Ketosis treatment and preventative on the market. It has these factors found to be effective in treating and preventing Ketosis. They are High Energy Propylene Glycol, Cobalt, and High Protein.

High Energy —

Ketosis basically is a dietary energy deficiency. Ket-A-Way helps to make up for that deficiency.

Propylene Glycol —

Ket-A-Way contains 5% propylene glycol, the latest and most successful aid in the prevention and treatment of Ketosis. Propylene glycol has been found as effective . . . and in some instances even more effective, than lactates or propionate. At the same time it has none of the palatability problems of these other two items.
