ommendation for alfalfa weevil control will be either Malathion or Methoxychlor.

**AG. TEACHERS NAME HEBERLEIN** — Herb Heberlein, teacher of vocational agriculture at Solanco High School, was named president of the Lancaster County Vocational Agriculture Teachers Association for 1961.

Other officers elected were: Marlin Henninger, vice president; Robert Herr, secretary; Joseph McGahan, treasurer.

**MILK DEALERS SEEK PRICE CUT** — The Lancaster County Milk Dealers Association this week asked the Pennsylvania Milk Control Commission for a lower minimum they must pay for bottled milk to be sold out of state.

Local dealers contend they can not compete in interstate markets because their initial costs are higher than their competitor's costs. It

was pointed out that York County dealers last year were granted a minimum reduction similar to the one Lancaster dealers are asking. It was also observed that some of the York dealers are competitors to Lancaster dealers in the interstate market.

Under a 1956 Commission order, the price of Lancaster County milk varies seasonally from \$6.65 per hundredweight to about \$5.85 per hundredweight as fluid milk at farms.

**ROY B. HERR HONORED** — Roy B. Herr, Pennsylvania Poultryman of the Year in 1959, was honored by the Lancaster County Poultry Association here Monday night.

Herr, one of the founders of the Association, served as president for 12 years. He has also served as president of the Pennsylvania Poultry Federation. He has operated a poultry farm in the county for about 40 years.

# New from Hoffman . . . HAYMOR Alfalfa

**MORE HAY**

Haymor means just what its name says . . . you get more hay. In 20 different comparison trials in northern states, Haymor outyielded Vernal by an average of 4%—and in at least one case outproduced Vernal by 22%. In six of these trials where Ranger was also grown, Haymor averaged 12% more hay than Ranger. Haymor means more hay and more profit for you.

**FAST STARTS**

Haymor is noted for its excellent seedling vigor. It establishes fast to make a thick, healthy stand. Its extra vigor makes it easier to establish under more competitive conditions.

**RESISTS DISEASE**

Haymor has resistance to bacterial wilt disease and has good tolerance to common leaf spot diseases. This disease resistance is another big reason why you will want to put Haymor in your fields.

**WINTER HARDINESS**

Haymor has good winter hardiness . . . in the same class as Ranger. This feature, plus its good spring vigor, makes it ideal for normal rotations and general hay and pasture uses.

**LASTS LONGER**

Haymor is an unusually vigorous variety that performs well under all types of soil where alfalfa is grown. Because of good disease resistance and hardiness, it lasts longer and provides better hay and pasturage.

**HOLDS LEAVES LONGER**

Haymor holds its leaves extremely well. This ability to hold on to its protein-packed leaves means it makes top quality hay or silage.

**MATURES EARLIER**

Haymor—similar to Du Puits—matures earlier than most other alfalfas. In fact, Haymor is only about two days later than Du Puits—3 to 4 days earlier than most U.S. alfalfa types.

**MIXES WELL**

Haymor is a top producer whether it's planted alone or in combination with other legumes and grasses. Its disease-resistant features make it ideal for use in hay and pasture mixtures.

**Ten Years Ago**

**HOAR'S CHAMP STEER NETS \$1639** — The grand champion Farm Show Steer, a 1075-pound Hereford shown by Harry Lee Hoar, 14, of Gap R1, was knocked down to Howard Johnson Restaurants. The animal brought \$152½ a pound for a total of \$1,639.37. The 125 4-H baby heaves sold for an average of 29.56 cents per pound, bringing their owners a total of \$40,089.06.

**MORE SNOW EXPECTED**

—More than ½-inch of melted moisture resulted from last week's Farm Show-opening ice storm. Snows this Monday night clogged several southern Lancaster County roads, forcing school closings. Five-inches of snow (Continued on Page 13)

protect your farm against power outage

**WINCO® POWER INSURANCE TRACTOR GENERATOR**  
with MAXI-WATT EMERGENCY POWER

Provides dependable emergency electric power for lights, heat, refrigeration, milk cooler, and water system. New WINCO 15 KW PTO with MAXI-WATT gives Extra Power, Performance, and Value! Belted tractor model and complete line of tractor and engine generators from 1500 to 15,000 watts. (Int. Duty)
