

Plant Disease

(Continued from Page 13)

causes, development and control, Heuberger explains. The goal of plant pathologists is to reduce the billions of dollars lost to plant diseases every year in food crops, forest and timber lands, pastures, golf courses, nurseries and even home gardens and lawns. "Many more plant pathologists are needed than are being trained, particularly since there are only 2500

Southeast Pa. DHIA Plans Spring Conf.

The Spring Conference of southeastern Dairy Herd Improvement Association directors has been set for March 3. Lehigh County will host the conference this year which will convene at the Trexlertown Grange Hall. The program will include

in the United States today, he says.

reports from the treasurer, the plaque committee, the sale director, insurance, testing programs, the fieldman, and on weighing and sampling devices. To help in the reports, Herb Gilmore, Dexter Putnam and Carl Hollinger will be on hand.

The noon meal will be served by the ladies of the Trexlertown Grange. Any directors interested in attending are asked to contact the Lancaster County Agent's Office before February 25th.

2 power sizes, 3 crop clearances

The 38 h.p. 1020 and 53 h.p. 2020 can be yours with 17, 20, or 24 inches of crop clearance

When we say 2 new tractors, we really mean 6—because the totally new "1020" and "2020" Tractors are both available in three different models. The LU Model is designed for utility jobs where compactness counts. It has a low hoodline and 17 inches of under-axle clearance. The RU Model has 20 inches of crop clearance, making it just as much at home cultivating row crops, as mowing alfalfa or loading manure. With 24 inches of crop clearance, the HU Model is ideal for the farmer who needs extra clearance and also desires a compact, highly stable tractor. Stop at our store soon... see all three models in both power sizes.
