Judy Flory, Lititz R2, received the award for Reserve County Champion

● **Egg Industry**

(Continued from Page 1)

tional Lenten rules will undoubtedly have their effect for some time to come. Many Americans will observe the old traditional diet patterns for a few years," Dr. L. A. Wilhelm, PENB general manager, said

"However, the change in rules will affect our industry eventually. We can no longer count on a captive audience during Lent. Consumers will eat egg dishes because they want to not because eggs are a good substitute for meat," he said

"This is a big challenge to the egg industry. We must redouble our efforts to supply such consumers with imaginative, appealing, economical egg dishes. We now have a bigger fight on our hands for our share of the consumer's food dollar," he said

It has been estimated by market sources that 30 to 40 percent of the increased egg sales during the Lenten season is for the purpose of colored eggs, with the remainder being due to the dietary pre-Easter regimen

**RUSSELL & KREIDER SALE**

**NFU Urges A Deferment Plan For Farm Boys**

An appeal asking military deferment for farm boys has been urged by the National Farmers Union Executive Committee.

In a statement sent to Selective Service Director Louis

B. Hershey the farm leaders urged the deferment for boys whose skills are vital in food production.

"With skilled manpower, as well as capital, being drained out of rural America, we strongly advise selective service to review the policy of drafting of farm boys for military duty.

"The average age of farmers in the United States now is 57 years of age. This means that if a farmer's boy

is drafted, he may have to liquidate his farming opera-

tions," the statement continued.

"There is already a shortage of competent farm workers who can handle modern farm machinery and valuable livestock. It is as important to defer youth for farm work where they can continue on-the-job training as it is to defer them for college.

"The heavy demands looming for an adequate supply of food in the face of world conditions emphasize the need to maintain a reserve of able young farm workers

not only to supplement the shortage of older farm and ranch operators, but to replace those whose advancing age is pushing them into retirement."

For a new flavor to Apple Brown Betty, make hard sauce in balls, roll in coconut, and chill until time to serve the dessert. Top each serving of dessert with one or more balls depending on the size of them.
