**FARM WOMEN NO. 14  
HOLD MEETING**

The Society of Farm Women, Group No. 14, met Wednesday, July 13, at the home of Mrs. John E. Groff, Willow Brook, Ronks, with 31 members responding to roll call with "The most exciting telephone call I ever received." Devotions by Mrs. Walter Himmelreich.

The guest speaker was Miss Sarah Martin, public relations office of the Bell Telephone Co. She gave an illustrated talk on "Famous Women of Pennsylvania."

A contribution of \$25 was made to the Lancaster County Farm & Home Foundation fund.

The annual picnic will be held August 10, at 6:30 p.m., at Lampeter Park. Each member is to bring two covered dishes.

Members were asked to save their rummage for a sale in the Fall.

Hostesses for the meeting were: Mrs. Groff, Mrs. Himmelreich, Mrs. Clarence Herr, and Mrs. Melvin Stoltzfus.

**Sewing Tips**

Many of the new fabrics can be cut more successfully by cutting one layer at a time. If you're choosing a pattern for a sheer fabric, check to see that sheers are recommended. The garment will look better if few seams show.

If you decide to use a sheer fabric, here's a suggestion for cutting and marking. Secure the fabric to tissue paper before laying out the pattern pieces. Use plenty of pins and very sharp shears. Transfer markings to the tissue, not the fabric.

Press as you sew is good advice. Press seams, darts, facings, and hems before you complete and join to other garment sections.

Make a belt to go with the dress in the same fabric as the garment . . . if you'd like to camouflage your waist. A narrow belt is also slimming.

**Seasonings and Poultry**

Serve poultry accented with seasonings at the peak of cooked quality.

Sprinkle seasonings on poultry before or during cooking.

For simple seasoning, use salt with a little pepper. Paprika, tarragon, rosemary, or garlic or onion salt accent poultry's bland flavor.

Heat sauces during the last 15 to 30 minutes of cooking time. This helps blend flavors. Try barbecue, white, tomato sauces or sour cream.

Cheese and toasted crumbs give poultry a new taste. Try onions, shallots, or celery.

**Labeling On**

**Upholstered Furniture**

Cellular foam—urethane or polyfoam—used in seating, backs, and arms of upholstered pieces. It is lightweight, durable, resilient, and resistant to wear. This foam is non-allergenic and mildew, fungus, and mothproof.

Latex foam rubber has many of the same characteristics of cellular foam. It is more resilient, extremely comfortable for sitting. It's more expensive than plastic foam. It is affected by heat and will deteriorate over a period of time.

Spring filled cushions with rubberized hair and/or cotton padding, and down and feather filling are also available. Any of these may affect allergy-prone people.

**Buying On Installment?** Be sure the contract tells: Exactly what you are buying, Purchase price, or amount borrowed.

Interest and service charge in dollars or simple annual rate.

Total amount due. Down payment.

Amount and number of payments. Dates due.

Trade-in allowances, if any.

**Staystitching Controls**

**Stretching**

Staystitching keeps bias or curved edges of garment pieces from stretching as you sew. Staystitch each piece as you remove the pattern from the fabric.

Staystitching is a single row of regular machine stitching done through a single thickness of fabric within the seam allowance. With matching thread, you stitch about one-half inch in from the cut edge of the garment piece.

Staystitch in the direction of the fabric grain to hold the cut edges in their original cut shape while you work on the garment.

Stitch from the wider section of the garment piece to the narrower, that is, stitch shoulder seams from the neckline to the armhole.

Pattern pieces have directional printed arrows to guide you in staystitching. Parts of a garment that need to be staystitched to prevent stretching include armholes, neckline, shoulder seams, waistline, bodice side seams, and the upper portion of skirt side seams.
