

N.Y.-N.J. Market Administrator Predicts \$6 Class I Milk Price

NEW YORK — Prices paid to dairy farmers for milk delivered to pool handlers in the New York-New Jersey milkshed during the last half of 1966 will average 66 cents per hundredweight (46.5 quarts) higher than in the same period last year, it was forecast this week.

A. J. Pollard, market administrator, said dairy farmers will receive an average farm price of \$5.21 per hundredweight for the coming six-month period, compared to \$4.55 a year ago.

Fluid prices (Class I), he predicted, will average 49 cents per hundredweight higher than last year, or \$6.02 per hundredweight.

Farm prices will be above 1965 in every month of the forecast period, Pollard estimated, with the biggest increase expected to be 69 cents per hundredweight in October and the smallest 64 cents in December.

Gains in fluid prices will range from a high of 51 cents

July Class I price of \$5.47 per hundredweight is a weighted average of the price as computed for the period July 1 through 4 and the price computed under an amendment to the orders which took effect July 5.

Farm prices are those paid

to dairy farmers. Fluid prices are those at which handlers account to the pool for milk they use as Class I.

Receipts from producers are expected to be below 1965 during the forecast period, Pollard said, predicting declines for every month.

The forecast was issued at the request of members of the dairy industry and other interested persons, Pollard said. Estimates are subject to revision, he explained, since all factors used in their preparation are not definitely known at this time.

ANYWAY YOU LOOK AT IT . . .

Lititz Area Farmer Hurt In Filling Silo

J. Richard Boll, Lititz R2, was injured seriously last Friday when his right arm was caught in the machinery while he was filling a silo.

A brother, Daniel, succeeded in freeing Richard's arm, and following emergency treatment at a doctor's office in Lititz he was taken to Lancaster General Hospital.

Mrs. Boll said this week that his condition is improving and that the doctors are quite certain they can save his arm.

Angus Assn. Schedules Field Days For Youths

Pennsylvania youngsters will get some tips on how to do a better job of selecting, feeding, fitting and showing their beef steers and heifer projects this month.

A series of field days, sponsored jointly by the agricultural extension service, and both the American and Pennsylvania Angus Associations, will be offered at four times and locations throughout the state.

For southeastern Pennsylvania the Jaques Dupont farm, West Chester, will be the site, and July 28 will be the day. Each field day will include demonstrations on type, fitting, showing, clipping and grooming. There will also be talks on calf grading, judging and beef cattle production. All field days will begin at 6 p.m. and last approximately three hours.

Other dates and locations in Pennsylvania include July 25, Mrs. Mary Ellis Turner's Ayron Farm, Ebensburg; July 26, Gerald A. Biggs' Fulton Valley Farm, McConnellsburg; and July 27, Robert L. Reitz farm, Milton.

ABC To Host Farm Families July 19th

The Atlantic Breeders Cooperative has set Tuesday, July 19, as the date for a Twilight Meeting at the coop's headquarters, Route 230, Bv-Pass, Lancaster. The meeting will begin at 7 p.m.

With all farm families and their friends invited, Atlantic Breeders promise interesting speakers, a Bull Show contests with prizes, and games for the youngsters. Dairy refreshments will be served.
