

Entry Deadline August 15th For All-American Dairy Show

HARRISBURG—Dairy farmers in the United States and Canada have little more than a week to enter animals in the third Pennsylvania All-American Dairy Show. Harold R. McCulloch, manager, reminded dairymen this week

Entries close August 15. All with postmarks of that date or earlier will be accepted. Those mailed after that date will be declined. The show will be held September 12 to 16 in the State Fair Show Building, Harrisburg.

McCulloch said entries have been arriving steadily for the past month. He said that on the basis of experience in the first two All-American shows, the bulk of entries can be expected near the entry deadline. A heavy volume of last minute entries he indicated,

Weather

Cooler weather is forecast for the next five days with temperatures averaging below the normal range of 86 to 65 degrees. Although little day-to-day change is expected, the weatherman looks for the coolest temperatures to occur toward the end of the period.

Thunderstorms and scattered showers about Monday may yield 1/2-inch or more of precipitation.

● Dairy Judges

(Continued from Page 1)

Last year the county team, led by Kettering's blue ribbon individual performance, finished in a three-way tie for seventh place in the 42-team state event.

The dairy judging team will be among forty-two 4-H Club members representing the county during State 4-H Days August 8-10 at Penn State University. These young people will be competing with some 1200 other 4-H'ers from all over Pennsylvania at the 48 judging and demonstration events.

bred animals, both bulls and females, of the Ayrshire, Brown Swiss, Guernsey, Holstein, Jersey and Milking Short-horn breeds.

Nearly 2,500 head were entered from sixteen states and two provinces in Canada at each of the first two shows.

McCulloch said preparations have been made to handle the same number this year. An added feature will be the official 1966 national Ayrshire show.

One-half of a \$100,000 budget will be available for cash premiums. These will range

up to \$200 each. More than \$40,000 has been contributed by members and friends of the dairy industry as class sponsors and show supporters. The balance is state appropriation that has been made available through the Department of Agriculture.

CATTLE WORMER

with THIBENZOLE

AN EFFECTIVE, SAFE AND CONVENIENT WAY TO KILL WORMS

ROUNDWORMS can reduce your profits

Roundworms in your dairy and beef animals can cost you money by delaying growth of calves, young stock and replacements, delay reaching of breeding size, and cause a lowered performance of older animals.

Now — you can attack the roundworm problem in steers and dairy cows by feeding Red Rose Cattle Wormer with Thibenzole. Until Thibenzole was developed there was no efficient way for dairymen or cattlemen to control damaging roundworm parasites. Red Rose Cattle Wormer controls these worms in a one-feeding wormer. It can be fed to pregnant cows, young calves and heavily-parasited dairy or beef animals.

When you establish a roundworm-control program on your farm with Red Rose Cattle Wormer with Thibenzole in the feed — you can be assured bigger, faster-growing calves and heifers, earlier breeding size, and better performance of steers and cows.

RED ROSE CATTLE WORMER is

- Effective** — kills adult and immature worms.
- Palatable** — Thibenzole has no taste. Animals don't go off feed.
- Convenient** — animals need not be restrained to be wormed. It's easy to feed to range animals in cube form.
- Profitable** — its costs will be returned in extra weight gains, faster growth, earlier breeding, and a better herd.

Start a roundworm-control program on your farm today by using Red Rose Cattle Wormer. Your Red Rose Dealer will explain the advantages of this wormer and will suggest recommended dosages and method of worming.

Buy Red Rose Cattle Wormer and the complete line of Red Rose Dairy and Cattle Feeds from these dealers.
