**SMALL
GRAIN
SUPREME
5-11-14**

with Rheolite (R)

A quality fertilizer designed to help the grower achieve higher grain yields and make more profit. Miller's Small Grain Supreme offers the following extras:

1. Stronger straw to help prevent lodging.
2. More uniform crop with fuller kernels.
3. Crop will ripen more evenly.
4. Crop is in better condition for overwintering—less plants lost.
5. More nutrient value in the harvested crop.
6. Is a mineralized granular product.
7. Contains RHEOLITE(R) — Miller's organic fertilizer lubricant which insures free flowing qualities.

● **Swine Assn.**

(Continued from Page 1)
Lampeter Fair, said secretary James Z. Martin. To enter the carcass show, exhibitors must be members of the association; there will be a \$1 entry fee, Martin said.

Carcasses will be judged by a University meat specialist on a basis of ham-loin percentage and meat quality. Trophies will be awarded to the grand and reserve champion exhibitors.

Martin stated that all entries must weigh between 190 and 220 pounds to be eligible to win, adding that animals outside that weight range will also be evaluated, though not considered when selecting the winner.

Producers are urged to have their entries at the swine tent on the fairgrounds by 5:30 p.m. on Thursday. Judging will begin at 6:30 p.m.

Those members wishing to enter are advised to mail the \$1 fee to Martin at Christiana R1 no later than September 24. "This show is not only for purebred breeders; it is conducted for all swine breeders to get an 'inside view' of the swine they are producing, and to further develop the ability of producers to choose the type of animal on foot which will cut out the meatiest carcass," Martin emphasized.

The on-foot evaluation contest to judge meatiness will be open to everyone. Each participant's card will be scored against the official carcass data. Cash prizes ranging from \$10 to \$250 will be awarded to the top four judges, Martin said.

● **County Fairs**

(Continued from Page 1)
Defending champion at Ephrata will be Glenn Flackinger, Ephrata R3, who topped that show with an Angus. Reserve champ was another Angus exhibited by Sharon Weaver, New Holland R1.

No hog show is scheduled for the Ephrata Fair, but at Solanco that event will immediately precede the steer show. Last year, George Ewart of Peach Bottom R2 had the champion pair of hogs, with William Frey's entry taking reserve. All FFA hogs and steers shown at Solanco will be consigned for sale at 2

p.m. on Friday.

The dairy show at Solanco is set for opening day, Wednesday, at 1 p.m. Last year Earl Wenger, Quarryville R1, and Ken Rutt finished one and two in the 25-head Holstein dairy show. Top Guernsey honors went to Earl Mull, Quarryville R1, and Larry Breneman, Strasburg R1, respectively. Jay Marvin Herr, Holtwood R1, and James Esbenshade, Quarryville R2, took the top titles in Jersey and Ayrshire competition.

The Ephrata Dairy show will be held Friday at 7 p.m. in the Ephrata Community Park.

Tractor-driving competition will be featured at 9 a.m. on Thursday at Solanco, and at 1:30 p.m., Saturday, at Ephrata.

Other perennial events at the two fairs will include corn and tobacco exhibits, poultry, fruits and vegetables, parades and queen coronations.

**HIGH CAPACITY
AUTOMATIC
BUNK FEEDER**

GIANT CAPACITY

A powerful 9 inch auger is offset within a giant, fully enclosed 12-inch steel hood. This unique design provides a reservoir for silage and feeds the full length of the feeder, greatly increasing the capacity and speed with which feed moves to the livestock. Handles the output of the largest silo unloader with ease.

FEEDS ENTIRE HERD AT ONE TIME

Feed is augered the full length of the enclosed hood and is then automatically dumped into the feeding bunk, providing equal rations to each head of livestock at the same time. No cattle crowding. No spilled and wasted feeds. When feed is dumped, the hood closes automatically and repeats as often as needed.

SILENT, CLOG-PROOF OPERATION

Powerful 9-inch auger never touches the metal hood; eliminating metal-to-metal friction and providing the right clearance to prevent binding and clogging even when materials have high moisture content. Horsepower requirements are greatly reduced too.

**Feeders everywhere are talking about
Ful-O-Pep Cattle-izer Beef Supplement**

In feedlot after feedlot—commercial and farm—feeders are reporting better gains and conversions at lower feed cost.

The reason: It's Ful-O-Pep Cattle-izer Beef Supplement . . . designed to enable the beef animal to get up to 20% more energy from the same amount of feed . . . and to use that extra energy for faster, more efficient gains.

Gain, efficiency of gain, cost of gain, market value of cattle, and other factors are reflected in net return. And net return, cattlemen are reporting, is higher when Ful-O-Pep Cattle-izer Beef Supplement is fed.
