More Total Digestible Nutrients in corn silage when treated with

المراج المراجع والمراجع والمرا

Controlled Experiments have shown:

* Six times more starches and sugars retained when SILO GUARD was used.

* Silage with SILO GUARD had 0.22% Propionic acid (as compared to just traces in the untreated silage). This is why FERMENTA-TION CONTROL PROCESS silage does not mold or decay even after being exposed to air for some time when taken off the silo.

Vitamin A was present in just a trace in the untreated silage as compared to 21,000 units per ton in the treated. In this experiment the corn was cut in advanced dent stage when the Vitamin A content is usually very low.

SILO GUARD treated corn silage figured on a wet basis (as fed) has retained the most valuable nutrients that are in corn when freshly cut. Analysis of the untreated sample indicated that these nutrients are destroyed in the uncontrolled usual fermentation that takes place when corn is ensiled without the SILO **GUARD** Fermentation Control Process.

(Continued from Page 1) that the river basin is not being used as it was intended in the original plan. A river basin "compact" among the states of Pennsylvania, Maryland, and New York, it was felt, was necessary if full potential of the basin is to be realized. As proposed, this compact would give equal administrative voice to each of the three states, although culture. the bulk of the land lies in legislatures of each of the states involved, Hackman said.

New John Deere 237 Corn Picker

raises the speed limit in high-yield corn

Shift up¹ Pick at speeds up to 5 mph, even when yields run well over 100 bushels. Long, tapered gatherers and high inside shield, funnel stalks right in. Even tangled stalks seldom escape three roller-type gathering chains. There's new gathering and snapping speed. And the 237's spiral snapping rolls cut shelling loss in half.

Faster elevators with higher flights move corn up fast. Trash goes too, aided by new rotating trash paddles. New husking rolls — cast-iron spirals against serrated rubber - peel husks, pull trash through. You pick clean. See the new 237 soon. Ask about the Credit Plan
