

LINCOLN 4-H'ERS MEET WITH FARM WOMEN 3

Society of Farm Women group No. 3 met in the fire hall at Mt. Airy. The program consisted of demonstrations by 36 members of the Lincoln 4-H Sewing Club. 4-H Club president Brenda Bollinger and secretary Louanna Bucher conducted a regular meeting, with Betty and Dolly Bollinger, song leaders. The girls who were first-year members gave demonstrations on What to Keep in a Sewing Box, how to thread a sewing machine and name all the parts, care of the hands, and correct posture. They also displayed TV slippers they made during the session. Second-year girls

modeled their jumper shifts they made. Third-year girls modeled school dresses and wool skirts. One free lance girl modeled a suit. Leaders of the group are Mrs. Harold S. Stuber, Mrs. Ivan Eberly, Mrs. Ernest Hartranft and Mrs. Stephanie Schnupp.

Society No. 3 presented pocket books harmonizing with the dresses they modeled to all the 4-H girls present. Mrs. William Eberly, president, conducted the business meeting. Auditors appointed were: Mrs. Willie D. Stober and Mrs. Adam Kopp. Society Seal and Insigna was purchased from a printer to be used in the local Society.

New utensils and equipment were purchased by the committee consisting of Mrs. Earl

work, delaying seed preparation for fall planting, the harvest of late potatoes and cutting of tobacco in Lancaster County. Approximately half of Lancaster's tobacco crop has been harvested, the service reported.

Latschau and Mrs. Ivan Eberly. Mrs. Raymond Phail was hostess for the meeting and also had charge of devotions.

Refreshments were served by the hostess. Next meeting, October 15, will honor past presidents and charter members. It will be held at the home of Misses Mary M. and Ada S. Royer, Ephrata R2.

Fruit growers have virtually completed the peach harvest, to be safe from frost. Most of the corn will require two or three more weeks of good weather to reach maturity.

Light frost damage was reported to corn in a few scattered sections in northern and western counties last week. The Crop Reporting Service pointed out that only about one-fourth of the state's corn

is far enough advanced to be safe from frost. Most of the corn will require two or three more weeks of good weather to reach maturity. Pans are easier to clean if they have a pronounced curvature between the sides and bottom and no ledges or rivets on the inside where food can collect

We chose electric heat because my husband is a carpenter.

My husband has helped build homes with all kinds of heating systems and has found electric heat saves money in two ways. No furnace, radiators, chimney or fuel tank is needed when the home is built — and later on — electric heat saves on cleaning, maintenance and service bills, when the home is being heated. And best of all, electric heat is safe, low-cost operation, and fits any home design.

We recommend you go electric, too. It's as low as 10¢ per kilowatt-hour. IF YOU ARE BUILDING — tell your builder you want to be modern, you want the best, you want electric heat. IF YOU ARE REMODELING — call a Reddy Kilowatt Recommended Electric Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."

end "Stop and Go" corn harvesting!

Superpickers now have Rubber Flexi-Finger Presser Wheels.

A brand new feature you'll see on New Idea corn pickers in 1966. These powered presser wheels with life-like rubber fingers align the ears for better distribution, keep ears moving along the husking rolls. Result? Greater capacity, cleaner corn.
