

4 Flying Farmer Chapters Honor L. L. Logan

Mr. and Mrs. Harry Wilson, Nottingham, recently flew into West Chester Airport to call upon Mr. and Mrs. Leebeet L. Logan, 1204 Paoli Pike, West Chester. The purpose of their call was very much a surprise to the Logan's.

Logan retired as Director August 1, 1966. Harry Wilson was elected to replace him.

Mrs. Wilson is still reigning Queen of the Pennsylvania Flying Farmers and is immediate Past Queen of International Flying Farmers. The presentation was to have been a surprise for Logan at a joint meeting of the four chapters at Lindenwold, N.J., September 18th, but Logan was unable to attend that meeting since he was recovering from recent surgery.

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

IT'S WORTH KNOWING

You walk at least 4 miles and spend 25 hours of your time during one year in making just one bed by the common dash-around method. Save time and energy by making one side completely, then the other side.

People who work with speed and efficiency usually have a plan. They organize their work in a logical sequence and do various jobs when they are timely. Defrosting the refrigerator before you do weekly shopping is one example. The job is simpler when food supply is low.

To get full efficiency from your washer, use it every day or two, instead of 1 day a week. You prevent soil and grime from damaging fabrics when you wash them frequently, soon after they are worn. When you wash often, you need fewer clothes. This point is especially important when there are small children in the family. Daily washing is easier on the hot water supply and less tiring to you.

Two Kinds of Rayon Marketed

The older type rayon is weak when wet. You must handle it carefully during laundering. It also has poor dimensional stability, and you may find it difficult to press back into the correct shape.

The new high-modulus or high-strength rayons are strong when wet. Some trademarks names for the new high-strength rayons are Avril, Avron, Corval, and Topul rayons.

THOMAS

Sewing With Laminates
Laminated fabrics have a thin layer of polyurethane foam bonded permanently to one side of fabric or between fabric layers. When you sew with these laminates, it's worth knowing . . .

You don't need interlining or interfacing.

Your pattern should be simple and require little fitting or tailoring.

You won't have to shrink fabric.

Place pattern on right side of fabric, grainline perfect. When folded, place foam sides together.

Place pins at pattern markings and mark with chalk. Use medium needle, medium-long stitch, and small amount of pressure.

CROP NEWS

FRUIT & VEGETABLES

Most late varieties of apples are sizing nicely, and picking should reach peak soon. Some growers report Staymans are splitting as a result of abundant rainfall. Harvest of grapes for processing started during the week in Erie County. Quality of Concord is very good in most sections this year. Tomato picking is nearly completed in all areas. Ripening has been slow because of cool wet weather, and labor shortages. Some growers in the south are salvaging green tomatoes for relish.

N. H. Hog Show
