Read Labels On Upholstered Furniture

Upholstered furniture is made with a wide variety of cushion fillings. The label, required by law, names the material used. When you shop for a chair or couch, check the label for type of filling used.

Cellular foam — urethane or polyfoam. Used in seating, backs, and arms. Lightweight, extremely durable, resilient, resistant to wear, non-allergenic, and mildew, fungus, and moth-proof. Can be used as solid unit or as a core when wrapped with soft polyester material. Wrapped cushion with foam core offers feeling of down but retains resiliency of foam.

Latex foam rubber — more resilient than foam filling. Extremely comfortable for sitting; and is more expensive than plastic foam. It is affected by heat and will deteriorate over a period of time.

Let's Look at Bread — Homemakers buy about 250 loaves of bread each year.

THOMAS — Don't squeeze bread to "test" freshness . . . it doesn't work. Today's softeners . . . sodium propionate, for example . . . keep bread fresh longer. Bread stays mold-free longer than bread did years ago. Thank two mold inhibitors called "Diet" bread as often regu-
