

Poultry Banquet

(Continued from Page 1)
 "Great Society" was ever heard of. Cockerel, who is vice-president and director of marketing for the Watt Publishing Co. of Mount Morris, Illinois, took his audience back to his Kentucky birthplace for many humorous visits with his family, friends and relatives, which he used to illustrate his subject. "Men and Ideas" was the subject that Cockerel spoke on. "I've always regarded me," Cockerel said, "perhaps because I've had so few of them. I've not the acceptance or rejection of my ideas by big men that determines the destiny of the world," he stated. "It is what the average man does with little ideas that determines the course of history."

As an example, the speaker reminded the poultrymen how all the experts had predicted some years back that the poultry industry in the northeast would not survive; it would all move south. A lot of you poultrymen apparently didn't know that, or didn't believe it, he said, because you went right ahead with your "little" ideas for expanding. As a result, Lancaster County moved from number three poultry county in the country to number two, according to the 1959 agricultural census. He said he would not be surprised to learn by the time the 1964 census is finally summarized that Lancaster County was number one in the country.

Cockerel told the poultrymen he believed that the strongest phase of agriculture in the future will be the poultry industry.

4 Directors Chosen

The county association members elected four directors to three-year terms. Reelected were Roy B. Erb, 118 Kreider Ave., Lancaster, and Paul S. Hiestand, Manetta R1. New directors on the board will be John Jacob Oberholtzer, 171 Newport Rd., Leola, and John H. Hess, New Holland R2. Hess is in related industry, the others are poultrymen.

Guests Introduced

Among the many outstanding guests introduced were Lilli Ann Wivell, Columbia R1, 1986 Lancaster County Poultry Queen; and Dr. Kenneth Goodwin, newly appointed head of the Poultry Science Department at Pennsylvania State University.

State Grange

(Continued from Page 1)
 "This year Scott was honored for his years of distinguished service to Pennsylvania agriculture."

At the recent Grange Convention delegates voiced strong opposition to any move to sell intoxicating beverages at the State Farm Show Building.

Delegate also called for placing of milk jug operators under the same type of regulation as other dairies and milk processors, and favored retention of the State Milk Control Commission.

Paul Dague

(Continued from Page 1)
 Dague who has been very active in agricultural affairs as minority chairman of the House Committee on Agriculture. Tickets at \$4 per person should be obtained from association president Noah Wenger, Stevens R1, by Monday, November 14.

Milk Hearings

(Continued from Page 1)
 Through temporary actions effective July 5 dairy farmers supplying milk for all federal order markets were assured a higher level of returns for their milk sold for home use during the period July, 1966 through March, 1967. This decision was announced on June 30, when the support price for manufacturing milk was set at \$4.00 per hundredweight.

Deliveries of milk by farmers to all federal order markets improved in September compared to last year, USDA reported, but sales were down with the result that the percentage of deliveries of Class I milk was somewhat higher this year.

Producer groups say the improvement in milk supplies has been achieved on the basis of present price levels, but added that rising costs threaten to wipe out any price gains made to date.

4-H Awards

(Continued from Page 1)
 handyman, and photography exhibits; horse programs; outstanding overall project achievement; and judging teams in agriculture and home economics.

Also featured on the program were a fashion show by 4-H girls, and a slide presentation "I Am A Nation." A panel discussion by 4-H Club members covering the value

and meaning of district, state, and inter-state events was presented along with one of the winning demonstrations at the district level.

Water Resources

(Continued from Page 6)
 concluded that, in general, the quality of the water and the carrying capacity of Lancaster County streams is not good. This is partly due to the low-flow situations of most streams, siltation, and the levels of contaminants being dumped into them. One suggestion for increasing the flow of the streams was to create reservoirs from which water could be drawn to supplement streams depleted.

It was also pointed out that the costs of such reservoirs would be high, and would still not go very

far in solving the long range problem. In assessing flood problems in the county, Chickies Creek at Manheim was cited as the only stream figuring in substantial damage.

Authors of the report, E. H. Bourquard and Associates of Harrisburg, concluded that the surface water in the county's streams was not the answer to the growing need for increased water supplies.

They felt that, until the year 1985, ground water supplies would be adequate and satisfactory. We will examine their findings on ground water supplies in the next section.

Consumers now spend less than a nickel of every quarter of their disposable income for food. Of this amount, the farmer gets less than 2 cents

ORDER NOW & SAVE on ORTHO UNIPEL FERTILIZER

The unique Ortho Manufacturing process gives you two different forms of nitrogen and phosphate — fast acting and long lasting.

Available in the following analysis 16-16-16, 20-10-10, 10-20-20, 13-34-10. Available in bags and bulk.

CONTACT US NOW FOR EARLY SEASON PRICES AND LIBERAL DISCOUNTS.

Here's the answer to your MANURE PROBLEMS

EASY WAY MANURE DISPOSAL SYSTEM

Saves Time—Saves Fertility

Just scrape or wash manure, bedding waste and feed into Easy Way holding tank. When you're ready, the powerful agitator and self-priming chopper impeller pump will put the homogenized mixture into Easy Way liquid field spreader. No clog—no mess—no stink.

For complete information on the

EASY WAY DISPOSAL SYSTEM write to:

CALEB M. WENGER

R. D. 1, Drumore Center K18-2116, QUARRYVILLE, PA.

YOU'VE GOT TO HAVE A SYSTEM—GO JAMESWAY POWER CHORING

GALVANIZED ELEVATOR

for the Price of Painted

GALVANIZED ELEVATOR
 Extra-Heavy Galvanized chute. Longer wear. Stops leaks. Reduces corrosive damage. Cleans easier.

BIG J CLEANER WORKS FAST

With a Jamesway chain type barn cleaner you can clean gutters, load, field-spread and return before many other systems are even through cleaning the gutters. The Big J cleans up to 23' per minute. Stop in for an estimate on a Jamesway cleaner in your barn. We install and service.
