Sewing Durable Press Fabrics
Retailers are now selling durable press yard goods. For home sewing, keep these points in mind:

Interfacings, zippers, tapes, and linings should have the same shrinkage characteristics as the garment fabric.

Seams in the filling direction can be sewn with less pucker than those on the warp.

Bias seams show less pucker than seams cut on the straight grain.

Top stitching adds pucker problems. Use a clean, well-adjusted machine with the lowest thread tension possible consistent with good sewability.

Select Quality Carpets & Rugs
Quality is measured by the depth and density of the pile. It is possible to get a poor quality or a good quality carpet in any fiber. Look for these indications of quality.

Look for closeness of weave. This refers to the number of these indications of quality. (Continued on Page 14)
