 tically unchanged from last year and will average about one-half of the cost of carrying out such conservation practices as establishing and improving vegetative cover, planting trees and practices aimed at the conservation and more efficient use of water.  
 Fifteen percent of this year's fund is set aside for new farms — that is, farms not previously enrolled in the program — and for beautification practices.  
 The county ASCS office announced that handbooks outlining practices eligible for the cost-share program will be available soon.

The total-electric home of Mr. and Mrs. Curtis Summy, R.D. 2, Lititz

We asked the Curtis Summys:  
 Is total electric living  
 as low-cost as we promised?  
 Their answer:  
**Yes! We paid just \$35.24 a month last year for everything, including electric heating!**

This low cost also included electric water heating, cooking, laundering, lighting, and all their other electric services.

That's why we say, to make a true comparison of the total costs of home heat and operating all your work-saving appliances, you must add together *all* costs.

With total electric living, for instance, there's just one service, one bill and no expensive maintenance contracts. But to get the true cost of flame-type heat, you must add together the fuel bill, the elec-

tric bill and the service contract. Put them all together and you'll see why we say live the total electric way as the Summys do.

**IF YOU ARE BUILDING** — be sure to tell your builder you want to be modern, you want the best, you want electric heat.  
**IF YOU ARE REMODELING** — call a Reddy Kilowatt-Recommended Electric Home Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."
