

### ● SWCD

(Continued from Page 1)  
senig, Lancaster County, said that in the important task of getting conservation on the land, the conservation directors themselves must be thoroughly sold on the practices and on the ultimate objective of such applied practices.

All panelists stressed the need for districts to analyze their problems, and to enlist the aid of all cooperating agencies and individuals in getting the job done.

State directors elected the following association officers for 1967: president, David Woods, Mercer County; 1st vice president, Lee Adamson, Washington County; 2nd vice president, Lester Crouse, Bucks County; secretary, Mrs. Sophie Westgate, Pike County; and treasurer, Byron Breisch, Schuylkill County.

William Voight, executive director of the Susquehanna River Basin Advisory Committee, spoke to the directors at a breakfast meeting.

Several state legislators, including Sherman Hill from Lancaster County, attended the two-day meeting.

The Lancaster County SWCD will host next year's state conference which will be held November 8-10 at the Host Motel, Lancaster.

### ● Baby Beef Show

(Continued from Page 1)  
head, he said Steers not selected for the Farm Show will remain at the Yards for the district show the following day. All Farm Show steers will be taken back home following Tuesday's roundup.

The Southeast District Show will begin at 9 a.m. on Wednesday.

needay, followed by the sale of all animals at 1 p.m. Each club member should be present to show his own steer, the county agent said, adding that a special county showmanship contest will be held following Tuesday's roundup. The top showman will be awarded a Hereford steer calf.

In the final period before the roundup, Smith urged all beef club members to spend time with their animals every day. In addition to careful grooming, he advised a minimum daily walking period of one-half mile.

### ● Holstein Type

(Continued from Page 1)  
The improved breed service is expected to have wider acceptance and practical application for all segments of the dairy industry: purebred breeders, commercial dairymen, educators and extension personnel, students of dairy husbandry and breeding, and especially within the A. I. animal breeding industry.

Descriptive type classification continues to use the industry standard alphabetic designations for general appearance, dairy character, body and mammary, plus a final, or overall score.

Beyond this, a practical description will be provided for each of 12 major parts of the cow considered to be of economic and genetic importance to the dairyman. This list covers stature, head, front end, back, rump, hind legs, feet and five parts of the mammary system. A single condition describing each of these parts will be assigned from a list of up to five graphic terms.

### ● Vo.-Ag. Teachers

(Continued from Page 1)

jobs in all these areas, not farming alone. For this reason, more teachers are needed, many to teach in new areas.

Education in vocational agriculture is now open to any high school student who wants work experience in the agricultural field he intends to enter. A boy without farm land can enroll in vocational agriculture if he is interested in an agribusiness career.

Practical work experience is now available from part-time work in local businesses or in school plots and shops. However, supervision of the entire program is still the responsibility of the agriculture teacher; he must coordinate work experience with classroom instruction.

The new law gives new opportunities and additional responsibilities to prepare youth and adults for the many occupations in the broad and dynamic field of agriculture. Barwick points out. The need for vocational agriculture teachers is critical and it will continue.

## DAIRYMEN-CATTLEMEN

Here's the answer to your MANURE PROBLEMS

EASY WAY  
MANURE DISPOSAL  
SYSTEM

Saves Time—Saves Fertility

Just scrape or wash manure, bedding waste and feed into Easy Way holding tank. When you're ready, the powerful agitator and self-priming chopper impeller pump will put the homogenized mixture into Easy Way liquid field spreader. No clog—no mess—no stink.

For complete information on the

EASY WAY DISPOSAL SYSTEM write to:
