## HIGH CAPACITY AUTOMATIC BUNK FEEDER

### GIANT CAPACITY

A powerful 9 inch auger is offset within a giant, fully enclosed 12-inch steel hood. This unique design provides a reservoir for silage and feeds the full length of the feeder, greatly increasing the capacity and speed with which feed moves to the livestock. Handles the output of the largest silo unloader with ease.

### FEEDS ENTIRE HERD AT ONE TIME

Feed is augered the full length of the enclosed hood and is then automatically dumped into the feeding bunk, providing equal rations to each head of livestock at the same time. No cattle crowding. No spilled and wasted feeds. When feed is dumped, the hood closes automatically and repeats as often as needed.

### SILENT, CLOG-PROOF OPERATION

Powerful 9-inch auger never touches the metal hood; eliminating metal-to-metal friction and providing the right clearance to prevent binding and clogging even when materials have high moisture content. Horsepower requirements are greatly reduced too.

LET US GIVE YOU COMPLETE DETAILS OF THE AMAZING VAN-DALE S-17 BUNK FEEDER

## For the Farm Wife and Family

## Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

### Children's Play Valuable

- Helps children understand activities around them . . . they learn by doing
- Helps develop personality traits cooperation, sharing, fair play, dependability, neatness and orderliness, alertness, resourcefulness, initiative
- Develops physical abilities.
- Gives opportunity to find out about physical environment . . . size, shape, color, weight, textures
- Is a channel for expressing thoughts and feelings
- Develops a sense of ownership and property rights.
- Develops joy in creative ability . . . to

THOMAS

make, to do, to create, to take apart and remake brings satisfaction and happiness.

Helps solve problems . . . by trying various solutions, the child learns to concentrate, to think with a purpose, and to make decisions.

### When Buying a Lining Fabric, It's Worth Knowing . . .

The weight of the lining should be suitable for the outer fabric . . . it should never be heavier than the outer fabric.

It should react in the same manner as the outer fabric to washing, ironing, drycleaning, and heat.

It should match or blend with the outer fabric

It should drape easily or give the desired body to the design

It should give shape or reinforce the garment without adding undesired bulk.

Fabrics for linings should be soft and slippery, so that the garment can be slipped on easily

The type of fabric appropriate for an underlining is determined by the design and silhouette of the garment. Soft lines need soft fabrics, stiffer or stand away lines need a firm fabric
