● Lime-Fertilizer

(Continued from Page 1)
and David Zacherl, Clarion County potato grower.

Fertility and plant nutrition research at Penn State will be summarized by two department heads, Dr. Walter I. Thomas, of the department of agronomy, and Dr. Darrell E. Walker, of the department of horticulture. All events, including a meeting of the Pennsylvania Plant Food Educational Society, Inc., and a banquet, will be held in the Nittany Lion Inn.

Penn State experiments with "pop-up" fertilizers will be described by Dr. Dale E. Baker, department of agronomy. The cause of apple "measles" will be discussed by Dr. C. Marshall Ritter, department of horticulture. Experiments with nitrogen in alfalfa production will be reviewed by Dr. Lawrence F. Marriott, department of agronomy. University of Delaware studies of nitrogen placement on corn, and sub-irrigation, will feature Dr. W. H. Mitchell.

Extension specialists on the program include Dr. Milford Heddleson on "Influence of Aluminum and Manganese in the Soil," Stanley G. Gesell on "Alfalfa Weevil and Its Control," Robert F. Fletcher on "Fertilizer for Vegetables Used in the Food Processing Industry," N. Henry Wooding on "Facts about Irrigation," and Dr. W. Wayne Hinsh on "The New Soil Testing Laboratory." James H. Eakin will moderate the panel of farmers.

New trends in corn production will be the topic of Allan T. Leffler, of the Pioneer Hi-Bred Corn Company. Developments in potash fertilization will be presented by Robert Wagner, of the American Potash Institute. Applications of moist lime will be reviewed by Merrill Dake and Rod Maxwell of Agway, Inc. Gilbert L. Terman, of the Tennessee Valley Authority, will discuss efficiency of nitrogen and phosphorus. Conference chairman and assistant chairman are James O. Dutt and Dr. Marriott, of Penn State, and the industry-phase chairman is Harold Jones, of the J. E. Baker Co., York.

● Cattle Meetings

(Continued from Page 1)
On Monday evening, January 30, Burdette will discuss "Reducing Feed Costs", and extension agronomist Dr. John Baylon will talk on "Silages For Beef Cattle".

The meetings will be held

● Egg-Breaking

(Continued from Page 1)

Every operation breaking eggs for sale in this form is required by law to obtain a license. Those who operate without a license are subject to a citation and possible fine.

The new regulations are important in that they require proper handling and storage to prevent any foreign matter from getting into the product, Funk said. An egg is an excellent base for the culture of bacteria. For this reason, sanitary plants, containers and other facilities are vitally necessary in the preparation of this product.

Continuous tests of Pennsylvania egg products prepared under the requirements of the new regulations have proved that bacteria counts can be kept low and that sales can be stimulated because of the higher quality of the products. Many large users in the East now are purchasing eggs from this state because of the higher quality.

The volume of liquid and frozen certified egg products rose sharply last year to 3.6 million pounds. An even greater increase is indicated for this year, assuring producers greatly increased income.

● Swine Assn.

(Continued from Page 1)
January 23, at 7:30 p.m. Leading the discussion on this subject will be Dr. Howard W. Dunn, research veterinarian, and Dwight Younkin, livestock extension specialist, both from Penn State University.

CARCASS SHOW

The association plans a Spring Carcass and Evaluation Contest for March 13, Martin said. It will be held at the Union Stockyards, and will be conducted along lines similar to previous contests. Martin advised producers to keep their eyes open in the meantime for good meaty animals that will weigh between 190 and 220 pounds by contest time.

DIRECTORY PLANNED

The association is also planning a Swine Producer's Directory, Martin said. An effort is being made to compile certain information on members' swine operations for later distribution to buyers and other commercial interests.

in the Milton Biecht School, north of the Lancaster Stock Yards on Litz Pike, Smith said. Starting time for both meetings will be 8 p.m.

Farm Records Course To Begin At Ephrata

A new farm records course will begin at Ephrata High School on January 24 under the adult farmer program, according to Charles Ackley, agriculture instructor. The course, which will be held Tuesday nights for the next four weeks, will include guest speakers Charles Kocher, of the Pennsylvania Farmers' Association, and Bill Dickenson of Penn State University, Ackley said. All classes will begin at 7:30 p.m.

The course outline is as follows:

January 24 — Farm Record Keeping Systems.

January 31 — Income and Expense Records.

February 7 — Depreciation Schedules and Records.

February 14 — Labor Records, Credit Accounts, and Farm Analysis.

All interested farmers are welcome to attend the classes, Ackley said.

● Lancaster Auction

1-3 195-255 lbs. 21.50-21.85, 85 head 1-3 180-190 lbs. 20.85, one lot 2-3 285 lbs. \$20.60.

SOWS — US 1-3 390-555 lbs. 15.50-16.10, one lot 1-2 320 lbs. 16.60.

SHEEP 44 — Three lots woolled slaughter Lambs steady. One lot Good and Choice 100 lbs. \$24, one lot Good 61 lbs. \$23, and one lot Good 115 lbs. \$19.

REMOVE NON-LAYERS

A few non-layers may show up in any pullet flock a few months after they start laying. Extension poultry specialists at Penn State University say poultrymen must decide whether to sell these birds or keep them with the hope they'll come back into profitable production. If houses are overcrowded, and non-laying birds are few, market those that have stopped laying.
