

"THIS IS ONE OF OUR BEST COWS," says Holstein breeder Daniel S. Stoltzfus describing eight-year-old Faith. A Pabst Roburke Rag Apple daughter, Faith had 20,535 pounds of milk and 716 pounds of butterfat in her last completed 305-day lactation. She is classified at 82, rated Very Good on front and rear udder, and Plus on feet and legs

supplement. For wintertime, the program is corn silage, hay and an 18 percent grain supplement, with silage fed at the rate of 25 pounds a day and hay at 10 pounds

Stoltzfus tees the haylage-silage program, with the feed distributed automatically into a 65-foot bunk feeder, is one of the best things a dairyman can do to save labor and lower his feed costs.

Cows in the Stoltzfus herd seldom receive more than 25 pounds of grain in their daily ration. They are fed according to a ratio of 1:3 if individual milk production is higher than 40 pounds, and at a 1.4 or 1.5 rate if production is less than 40 pounds

The Stoltzfus herd is housed in comfort stalls, and milked in place. At present, cans are

**Miracle Crop of the Century**

Diagram above shows amazing Sudax Brand regrowth in Texas trial. Over 2" a day

DEKALB and SUDAX are Registered Brand Names SX Numbers are Variety Designations

Strong words—yes! But it takes strong words to describe Agriculture's latest "miracle" crop—DeKalb Sudax Brand, the original Sorghum-Sudangrass Hybrids. These summer forages have about everything the dairy or livestock man could want in a forage crop. In test after test, they have out-yielded standard Sudangrass by 35-50%. Extremely tolerant to drought, Sudax Brand Hybrids can be grown most anywhere. They are leafy, tasty, high in feed value, and very versatile. Get the MOST from your feed acreage—plant DeKalb Sudax Brand Hybrids

**HIGH CAPACITY AUTOMATIC BUNK FEEDER**

**GIANT CAPACITY**

A powerful 9 inch auger is offset within a giant, fully enclosed 12-inch steel hood. This unique design provides a reservoir for silage and feeds the full length of the feeder, greatly increasing the capacity and speed with which feed moves to the livestock. Handles the output of the largest silo unloader with ease.

**FEEDS ENTIRE HERD AT ONE TIME**

Feed is augered the full length of the enclosed hood and is then automatically dumped into the feeding bunk, providing equal rations to each head of livestock at the same time. No cattle crowding. No spilled and wasted feeds. When feed is dumped, the hood closes automatically and repeats as often as needed.

**SILENT, CLOG-PROOF OPERATION**

Powerful 9-inch auger never touches the metal hood, eliminating metal-to-metal friction and providing the right clearance to prevent binding and clogging even when materials have high moisture content. Horsepower requirements are greatly reduced too.
