

Broderick Says Race For Space Is On In Penna.

The race for space is on in Pennsylvania claimed Lieut. Gov. Raymond J. Broderick last week at the banquet of the Soils Congress at the Holiday Inn Town, Harrisburg. Broderick said no longer do we

have an unlimited choice in selecting prime land for industrial, suburban and urban developments.

Competition for land around our metropolitan areas is increasing and this trend will continue, Broderick reported. He said that new super highways, new parks, lakes, camping grounds, golf courses and new communities are consuming great quantities of land in the commonwealth.

Broderick told the planners, local government officials and state and federal representatives attending the two-day session that the Pennsylvania Legislature is concerned about the stewardship of the natural resources in the commonwealth. He said today we continue to build upon the great work of William Penn and Gifford Pinchot in cleaning our streams, revegetating strip mine areas, developing new recreation projects and conserving the soil and water resources. Project 70 and the \$500 million land and water conservation reclamation bond issue are milestones along the road to a commonwealth of excellence, Broderick reported.

The two-day Soils Congress dealt with the use of soil surveys in selecting land best suited for urban and suburban developments. Ivan McKeever, State Conservationist of the U.S. Soil Conservation Service and Chairman of the meeting told the group that more than 50% of the land has been surveyed in the commonwealth. This survey program, he said, is being carried out by Penn State University, the Penna. Dept. of Agriculture and the Soil Conservation Service.

R. Budd Dwyer, Assemblyman from Crawford county, told the Congress that the Penna. State Legislature is concerned about soil surveys because many of the state agencies use surveys in their everyday work. He said that too often some of our new developments are a hodgepodge of disorderly developments with their accompanying problems of septic tank failures, contamination of wells, wet basements and flood damages. Dwyer said that approximately 20,000 septic tanks are installed

Action (Continued from Page 3)

years. Canada's crop has shown considerable improvement, and both Argentina and Australia expect to have large quantities for export. Despite this competition, however, we are still optimistic that our export goal of 750 million bushels will be met.

"What is crucial at the moment, however, is the urgent need to shore up prices. We have taken every possible action we can legally take to check this downward trend."

Actions listed by the Secretary include reducing the 1968 wheat allotment in line with the flexible farm program, holding CCC stocks off the market, moving large amounts of wheat under the Food-for-Freedom program, distribution of wheat certificates to ease the financial pressure of harvest time, commodity loans and selling or renting CCC storage bins to help withhold crops from temporarily glutted markets, loans for building on-farm storage facilities and for conditioning equipment, extension of loans on grain in commercial warehouse storage as a supplement to the long-time farm resale program, and negotiation of the new International Grains Agreement which next year will insure a higher minimum export price — about 23 cents a bushel above the level of the old agreement.

in the commonwealth each year. Past experience, he reported, shows that about half of these systems will fail within a five-year period because the systems were installed on unsuitable soils.

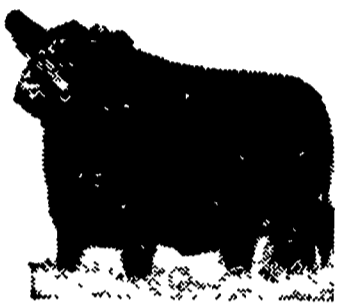

Other speakers appearing on the program included Dr. Russell E. Larson, Dean of the College of Agriculture; Dr. Milford R. Heddleson, Extension Agronomist; Dr. Robert L. Cunningham, Assistant professor of Soil Technology, Penn State University and Leland H. Bull, Secretary of the Penna. Dept. of Agriculture.

The Congress was sponsored by Penn State University, the Penna. Dept. of Agriculture and the U.S. Soil Conservation Service.

SPECIAL ROUND-UP

FEEDER STOCKER

CALVES and CATTLE SALE

Wednesday, Nov. 8
6 P.M.

Herefords, Angus, Shorthorn and Mixed Breeds.

All weights and all grades grouped according to weights and color.

Come get your cattle needs.

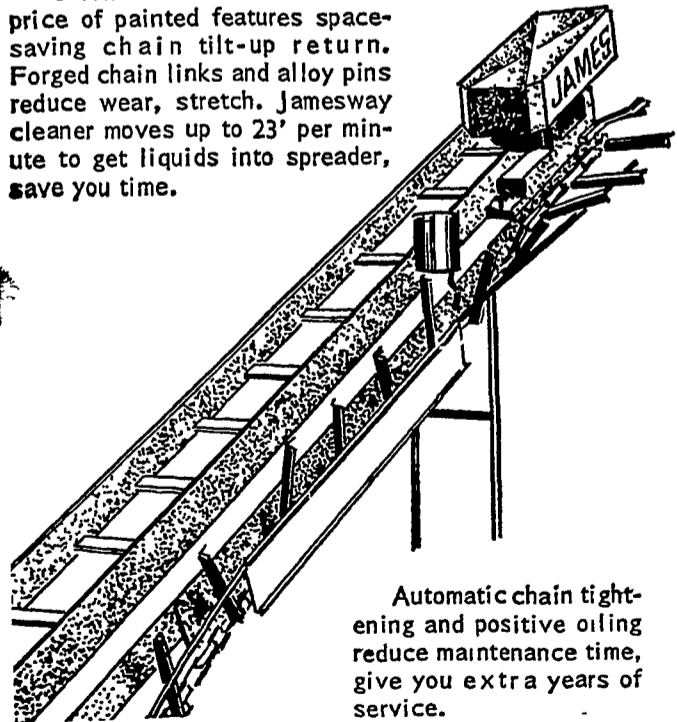

Staunton Union Stockyards

Rt. 254 just off By-Pass
Staunton, Va.

YOU'VE GOT TO HAVE A SYSTEM — GO JAMESWAY POWER CHORING

BIG J GALVANIZED ELEVATOR

Galvanized steel elevator for price of painted features space-saving chain tilt-up return. Forged chain links and alloy pins reduce wear, stretch. Jamesway cleaner moves up to 23' per minute to get liquids into spreader, save you time.

Automatic chain tightening and positive oiling reduce maintenance time, give you extra years of service.

why a Wayne Calf Program is good for your calves . . . and you too!

Calves develop into sleek, growthy heifers that develop into herd replacement stock early. The Wayne Calf Program gets calves on dry feed fast with no growth lag after weaning. Lets you sell more milk along the way and cuts your calf raising costs. You develop these rugged heifers with roughage and a complete Wayne calf ration or you can use Wayne concentrate and your own grain. Stop in soon and discuss the results dairy men in this area have achieved with the Wayne Calf Program.
