For the Farm Wife and Family Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

Cabbage Family Nutritious Part of Meal
Serve members of the cabbage family to your family. You can increase the popularity of these nutritious vegetables when you prepare them properly and serve them attractively.

For bright green broccoli with peak flavor, cook it in a small amount of water only until the stalks are tender crisp, or about 15 minutes. You can add toasted almonds for a topping.

For creamy white cauliflower with mild flavor, add about one-fourth cup of milk to the salted water in which you cook the cauliflower.

Try serving broccoli and cauliflower together for an attractive contrast in color and flavor. Arrange the broccoli spears around the head of cauliflower on a serving platter.

Add raw cauliflower florets to tossed salads for crunchy texture and pleasing creamy color.

Cook brussels sprouts whole or cut in halves or quarters. Season with lemon butter — use equal amounts of lemon juice and butter.

When You Buy Men's, Boys' Clothes

The sizing system for men's and boys' clothes is not uniform. The system that is used is based on body measurements. When you shop for men's and boys' clothes —

Have these measurements handy — current weight, height, and body proportions.

Measurements used are: height, chest, waist, trouser inseam, arm length, and circumference of head and neck.

Coats and jackets for men and boys are sized by height and chest measure.

Trousers, slacks, shorts, and

THOMAS

jeans are sized by waist measure and length of inseam.

For best results, have your man or boy along on a shopping trip — garments should be tried on for fit, comfort, and appearance.

Correct Glassware Storage Prevents Breakage

Store tableware in upright racks to save storage space and encourage you to use all of the dishes . . . not just what is on top of the pile.

Line shelves with felt or paper to provide a cushion for glassware. Arrange glasses with rims up. Never stack glasses or cups one on top of the other. Don't store and forget glassware . . . rotate it for daily use.

Flower bowls and vases need a shelf all their own. Arrange by height — tallest in back, shallow in front.

Be very careful of your fine crystal. It can be scratched if you slide it across hard surfaces.

If you must stack it, put a protective pad of soft materials, or foam rubber, between the pieces.
