GOOD FEEDING pays off here!

It's in the milk pail where the results of good feeding really show. How the milk gets in the pail depends largely on the roughage, grains and supplements you use to help the cows produce it.

You know, it's essential to feed balanced, complete rations that contain all of the necessary vitamins, minerals and nutrients that are needed for production and maintenance. It's only natural that you will want to use your home-grown grains. But remember, mix them with Red Rose Dairy Supplements to assure proper proteins. Then, you can be sure that the cows in your barn are eating just about the best feed you can provide. If you use complete feeds — choose from the complete line of Red Rose Dairy Feeds. They're available in many protein levels.
