

7,000,000th Holstein Female Registered

BRATTLEBORO, Vermont — Holstein-Friesian Association of America reports that on April 9 they issued the 7,000,000th female certificate of registry. The helper calf came from a group of animals for which Mr. Francis E. Persinger, Grundy Center, Iowa, had made application for registry.

"Miss 7,000,000" is officially named Fran-Cel Bachelor Angie, born July 31, 1967. She is out of Fran-Cel Maple Amber and sired by Lauxmont Bachelor "Very Good."

Mr. Persinger is a member of Holstein-Friesian Association of America and in 1967 received his third Progressive Breeders

Registry Award. His herd's DHIR average which ended April 30, 1967, was for twenty-two lactations — 15,466 pounds of milk and 578 pounds of fat. The herd was classified in September 1967, with a Breed Age Average Percentage of 102.6.

In 1964 number 6,000,000 was recorded. She is Sterk Kate Teena, owned by Henry Sterk, Artesia, California. "Teena" is now classified 83 points and has a junior two-year-old record of 365 days, twice-a-day milking, 20,930 pounds of milk and 730 pounds of fat.

During the past year the Holstein Association broke all pre-

vious records for the number of animals registered in a single year. The total was 276,875 and marked the tenth consecutive year the Association recorded over a quarter of a million head. With registrations continuing to climb, these milestone numbers occur more frequently.

A yield of 34 bushels per acre is forecast for Pennsylvania-grown winter wheat, the State Crop Reporting Service says. This compares with a 34.2 bushel yield last year. Production is estimated at 14 million bushels, down three million bushels from last year's production.

We will be looking for you to stop at our new store located at Christiana Milk Co.

Sincerely yours,
James M. Mimms.

● Have You Heard? (Continued from Page 19)

to wash them after each wearing.

Most require no ironing or—in the case of ruffles, frills and flounces—you can finger-press them in minutes to help them regain their fresh look.

Use of Cheese Varies Menu
Serve cheese for variety in meals and snacks.

Casseroles, sandwiches, salads, soups, and desserts take on added food value when served with cheese.

Cheese sauce gives a gourmet touch to combination dishes and vegetables.

Cheese served with fruit makes a light, nutritious dessert. Serve whipped cottage cheese instead of whipped cream for a dessert topping.

Gehl 72

never quits till you do!

The Gehl FC72 Flail Chopper out throws 'em all... even in heavy, wet crops. Right now thousands of FC72s are out there cutting a big 72-in. swath — close and clean — in the heaviest crops. Throw power? The Gehl 72 breezes right through rain soaked, dew laden forage. Here are some of the reasons why:

39 Reversible Flails give you a full 6-ft. cut. Razor-edged, double-edged . . . for double chopping life. Mounted in gangs of six and seven for quick switching.

Powered Double Chopping lets you cut short and fast. Your crop is flail cut, then augered to the unitized fan and knives . . . cut again against an adjustable shear bar and blown to the wagon.

Easy-Swing Drawbar adjusts from your tractor seat. Change to any of four positions . . . three offset and one for transport, with the pull of a rope.

Make us Prove it with a Demonstration!
