NEW! Self-Propelled Bunk Feeder!

First big new bunk feeding idea since the auger!

The new Badger Self-Propelled delivers any quantity of any feed evenly over the whole length of your bunk. It doubles delivery capacity, speeds feeding.

Initial cost is low. Feeding action of double-chain-and-flight unit is dependable. Geared-down speed means virtually no wear.

Don't install any bunk feeder until you've seen this new Badger Self-Propelled.

- Needs only 1/10 the power used by most bunk feeders.
- Really safe. All moving parts are high above bunk, out of reach of cattle.
- Completely eliminates feed separation. No chance for fine or heavy particles to separate.
- Installation is easy.
- Handles any material. Silage, grain, haylage, green chop, chopped hay.
- Inside or outside. Stanchion or other barn, as well as on outside bunks.

STAYS MIXED, WON'T CLOG

for fast, one-application weed control in tomatoes

Enide® 50w is a pre-emergence diphenamid weed killer. It mixes quickly and stays mixed because it's a 50% wettable powder with extremely fine particles. Application is fast because sprayer nozzles and screens won't clog. Enide gives you: ■ Up to full-season control with one application. ■ Control of most grasses and many broadleaf weeds. ■ Reduced cultivation costs. ■ Faster and cleaner harvests. ■ Higher yields and profits. ■ You can apply Enide at seeding, transplanting or within one month following transplanting. This year have better weed control. Stop in today and ask for Enide 50w.

PENNSYLVANIA CUT FLOWER SALES UP 2%

Pennsylvania remains the most important cut flower producing State in the northeast, with wholesale volume of carnations, standard and pompon chrysanthemums, gladioli and roses estimated to be \$12,065,000 in 1967, according to the Pennsylvania Crop Reporting Service. This is 2 percent above the 1966 gross wholesale value of sales. The wholesale value of potted mums was \$740,000, up 27 percent from a year earlier, for a grand total of \$12,805,000 wholesale value of sales for the flowers surveyed. In addition, foliage plant net sales totaled \$968,000, 5 percent more than in 1966.

Growers in the Commonwealth indicated they plan to increase production of all flow-

ers during 1968, except gladioli which they intend to reduce by 8 percent. Foliage plant production is expected to equal the 1967 crop. The leading producing counties in Pennsylvania during 1967 were: Chester, Bucks, Columbia, Montgomery and Allegheny. These 5 counties comprise about 60 percent of the State's flower and foliage plant industry.

Other highlights from the survey showed Pennsylvania to be:

Second in the Nation in production of roses — 12% of the 23 State total.

Third in production of pompon chrysanthemums — 7% of total.

Third in production of carnations — 6% of total blooms sold.

Fourth in production of standard chrysanthemums — 5% of total.
