

# PERFORMANCE IS THE KEY TO LOW COSTS

## FOR EXAMPLE:

One of our customers housed a cage flock at 21 weeks on July 12, 1967 (15,328 birds) — after being housed 33 weeks the results are:

**PER HEN HOUSED  
171 EGGS**

**ACCUMULATIVE FEED CONVERSION  
3.74 per doz. eggs**

## COMPARE

This with accumulative feed conversions of 4 lbs. and higher for similar periods in flocks serviced by others.

**4 lbs. CONVERSION**

Gives You 500 doz. eggs  
per ton of feed used

=

**3.74 lbs. CONVERSION**

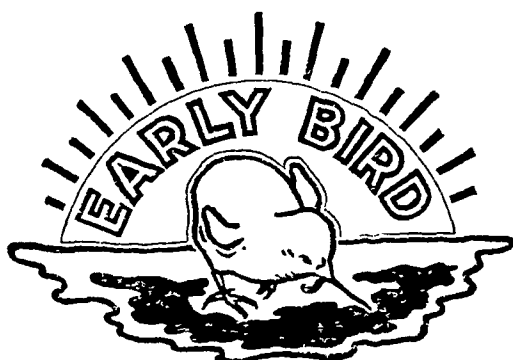

Gives You 534.7 doz. eggs  
per ton of feed used

**A BONUS OF 34.7 DOZ. EGGS  
PER TON ON THE  
EARLY BIRD PROGRAM.**

Multiply 34.7 Doz. By What You Get For Eggs And See What You Can Save On Early Bird.

**FOR BIGGER DIVIDENDS  
JOIN IN THE  
EARLY BIRD PROGRAM**
