

U.S. AGRICULTURAL EXPORTS SOLD FOR DOLLARS VS. AGRICULTURAL IMPORTS, 1955-67

CONSIDERABLY MORE U. S. dollars have come into the nation's economy from the export of Agriculture products than went out through imports. In industry the situation is reversed.

Raymond A. Loanes, Administrator, Foreign Agricultural Service,

told the nation's farm editors in Washington recently, that what this actually means is that Agriculture is helping to pay the bill of the economy. He also said that half the Ag imports were not competitive with U. S. farm production.

From Governor's Office

At a State mental hospital I recently visited, a pleasant looking woman darted across the room to the psychiatrist with me and urgently asked, "When can I go home, doctor? Soon?" The psychiatrist smiled at her eagerness and replied, "Yes,

stitutional care is no longer a dead-end street

Since this week we celebrate as Mental Health Week in Pennsylvania, I think it would be appropriate to reflect briefly on the changes in mental health care over the past several years. These changes are the result of new drugs which in turn have generated new attitudes toward

the mentally ill. Today, mentally disturbed patients must be kept locked in an institution only if they might endanger themselves or society. Tranquilizers have calmed many of the more unruly persons and allowed them to walk outside the institution to jobs and families.

Public awareness of mental illness is also much greater to-

day and the public is much more tolerant. More employers are willing to hire former mental patients and let them live within a community.

One approach to the problem of mental disability is a network of comprehensive community mental health services throughout the State.

10% extra daily gain—on 8% less feed

...with Ful-O-Pep Super Cattle-izer Beef Supplement

We've got the figures! Over 175 lots of steers and heifers have been fed Ful-O-Pep Cattle-izer at the Ful-O-Pep Research Farm. The usual improvement was 7% to 12% in daily gain... on 6% to 10% less feed per cwt. gain... with usual net return of \$3 to \$7 more per head! Comparison lots were fed exactly the same except for the "Cattle-izer." It's a great new development in ruminant nutrition.

How does it work? The "Cattle-izer" principle changes the proportion and concentration of several organic acids produced in the rumen... resulting in about 10% more useful energy from the feed.

Let us show you more records... more details on how Ful-O-Pep Super CBS can help you get faster, more efficient gains... higher net returns! Come in.

EXTRA NITROGEN BOOSTS YIELDS

Get these features with...

NuGreen
urea fertilizer

- **45% NITROGEN**
Highly concentrated "NuGreen" means less material to handle, time and labor savings.
- **LEACH-RESISTANT**
"NuGreen" holds to soil particles chemically, feeds plants when they need it most.
- **NON-CORROSIVE**
Organic "NuGreen" won't eat-up equipment... makes it last longer.
- **FREE FLOWING and NON-CAKING**
"NuGreen" comes in easy-to-use shot form for spreading. It also dissolves readily in water for spray or irrigation application.

For profit boosting yields and the best dollar return on your investment, practice a fertilization program based on a complete fertilizer and DuPont "NuGreen" urea fertilizer.
