### Cautious Optimism Expressed About World Food Situation

The world has trembled on the brink of a serious food disaster, but changing human attitudes combined with other developments now "permit a cautious optimism" about the future, the head of the Food and Agriculture Organization of the United Nations said recently.

was raging in large parts of India.

"One more bad harvest," he said. "And the whole world would have been in very serious trouble indeed."

World wheat stocks had been stripped "almost to the danger level."

Adeke H. Boerma, FAO Director General, made this point in a speech prepared for delivery at the 16th General Conference of the International Federation of Agricultural Producers (IFAP), being held in Tunis.

But today, Mr. Boerma said, India was looking forward to a bumper crop and wheat stocks were gradually rising in a healthy trend.

The need now was for international policies on the holding of adequate reserves in both exporting and importing countries.

He said today's optimism "might not have been justified even a year ago," when famine

**Didn't Coin Phrase** Grover Cleveland did not coin the expression, "A public office is a public trust," but he many times gave expression to the sentiment This served to fix the authorship upon him in the mind of the public

### why a Wayne Pullet Program is good for your pullets . . . and you too!

Laying house failure can often be traced back to a poor pullet. Good pullets, properly fed and managed, can pay off in the laying house. The Wayne Pullet Program sets the stage for better egg checks this fall by producing pullets with a minimum of fat, at the correct stage of sexual maturity, ready to lay at a high rate. It's easy to follow, too:

Start with Wayne Pullet Starter from 0 to 8 weeks. From 8 to 22 weeks select either 14% Pullet Developer, 17% Universal Grower or 22% Pullet Grower. Stop in soon to discuss the Wayne Program designed for you. Your egg check later will prove you were right with Wayne now.
