HONEYBEE SWARM SEASON IS HERE

The season for bees to swarm is here. Any day you may see or hear of bees clustered on a tree in your neighborhood.

Honeybee swarms to most people are nuisances. But to a beekeeper they're an economical way to start colonies of bees according to a Pennsylvania State University correspondence course on beekeeping.

Placed in front of an empty hive a swarm usually enters readily and sets up housekeeping. Feed sugar syrup until nectar is available in large quantities if you expect a swarm to develop into a strong colony.

Requeen swarms soon after you have them. Old queens leave former colonies with the swarms. Young queens are needed for their superior egg-laying ability. The future beehive population depends on the queen.

Old-time beekeepers used swarms to increase their colony numbers. But with modern management, increase is made

by dividing colonies without the correspondence course. Send problems of chasing and having your name and address with swarms. \$2.75 to Beekeeping Box 5000, University Park, Pa. 16802. bees enroll in the Penn State Make checks to PENN STATE.

No Other Protein Need When You Feed

SPECIAL TANVILAC

Feeders Say . . .
"The Most Economical Feeding Plan of All"

No trouble with scours or cattle going off feed. You'll be more than satisfied with our feeding program for you'll get healthy stock, quick gains at low cost. Remember, there's a FEED LOT PROVEN TANVILAC CULTURE PRODUCT FOR EVERY FARM-FEEDING PURPOSE.

USE ONLY 1/3 LB. SPECIAL TANVILAC PER HEAD PER DAY WITH GRAIN AND ROUGHAGE — GET BIGGER PROFITS
