

● **Have You Heard?**
(Continued from Page 11)

won't have time for loneliness. Time needed to adjust to new surroundings varies with the youngster, depending on his previous experience away from home, his emotional stability, and his ability to adjust to different situations.

A child who is really homesick will be physically ill and may even have an upset stomach. Use the same methods for curing homesickness as you did for loneliness.

Encourage a child to talk to help him get over his homesickness. Talk to him about his family, seeing familiar things, his parents at a similar age, and playing with children his own age.

Let the child know you understand his problems and assure him that it's not a disgrace to be homesick.

● **Annual Report**
(Continued from Page 8)

for Jays for recreation in the National Forests were recorded.

The USDA is stressing the coordination of conservation with economic development through multi-county resources conservation and development projects. At the end of 1967, 28 such projects were in operation with 13 others moving rapidly toward that stage.

THE FIFTH GOAL: SCIENCE IN THE SERVICE OF MAN —

"The impact of research and science on agriculture has been almost unbelievable," the report says. Actually, the impact is felt far beyond the farm. Agricultural research is of crucial importance in man's efforts to create a balanced and diverse environment, in improving hu-

man health, and in examining the life process itself."

Among the developments of 1967 were a tasteless, colorless fat from cottonseed oil which may change the packaging of nuts, meats, and other foods; conversion of soybean and linseed oil derivatives into a new rough material for making adhesives, films, and plastics; a new way to process tomatoes to almost any consistency from thin juice to a firm gel; a new process which makes cotton stretch fabrics stronger and less expensive; a chemical treatment for permanent press garments that may double the durability of the fabric; and a process for making nylon from soybean oil.

THE SIXTH GOAL: NEW DIMENSIONS FOR LIVING — Abundance was widely shared in a continuing effort to improve nutrition for the young and the needy. The report notes that:

*At year-end school lunches were being served to 19.5 million children — 5 million more than in 1961 — and 2.5 million children were being served free Under the Child Nutrition Act, 80,000 undernourished youngsters were getting good breakfasts daily.

*About 2.2 million persons in 818 areas of 41 States and the District of Columbia were participating in the Food Stamp Program — compared with 1.3 million persons in 477 areas a year earlier.

*Nearly 3.3 million needy persons in about 1,300 counties were participating in the direct food distribution program. They received 14 foods, including meat, cheese, and butter, compared with only five commodities in early 1961.

The report points out that the

out of oven with a damp cloth. While oven is cool, pour 1/2 to 3/4 cup of household ammonia into a bowl. Put in oven and close door. Seal oven vent so oven is as tight as possible.

Allow to stand overnight then take bowl of ammonia out of oven and add 1 quart warm water. Use this solution to scrub oven walls and bottom. Use a stiff brush if necessary.

Wash with detergent solution and rinse with clean water.

Wash oven racks with detergent solution and rinse before replacing. Turn oven on for a few minutes to dry out the interior.

For special oven cleaning directions refer to the instruction book that came with the range. Clean broiler pan after each use.

Take broiler pan out of range and pour out hot grease. Put grill on the pan and pour hot water over both. Add detergent and cover with paper towel or dishcloth.

Let pan stand in solution about 30 minutes. Then clean as you would any other pan.
