

Longer Engine Life by decomposing and producing
 A complex nickel chemical in nickel oxide which is plated out
 motor oil increases the life of at points of load, thus reducing
 certain automobile engine parts the rate of wear.

USDA Survey Shows Gains In Use Of Convenience Foods

Domestic food donations by the U.S. Department of Agriculture to improve diets of school children, needy families, and needy persons in charitable institutions totaled nearly 1.4 billion pounds for the first 9 months (July 1967-March 1968) of this fiscal year, nearly 20 percent more than during the same period a year earlier.

Schools received more than 713 million pounds of donated food during this 9-month period. And schools taking part in USDA's National School Lunch Program received an additional 206.3 million pounds through special purchases made by USDA's Consumer and Marketing Service. The 713 million pounds is an increase of nearly 44 percent from the same period a year earlier. Among the reasons for USDA's increasing food donations to schools are these: Enrollments in elementary schools and high schools have been increasing steadily and costs of serving school lunches have increased.

Food donations to the States for distribution to needy persons in family units came to more than 537 million pounds. In March, 35 million persons received food donations. Another 24 million benefited from USDA's Food Stamp Program. Thus, 59 million of the Nation's needy in family units got Federal food assistance at the end of the third quarter of this fiscal year.

USDA food donations for the 9 months to help feed needy adults and children in charitable institutions and children in nonprofit summer camps came to nearly 107 million pounds, an increase of 69 percent over the same period a year earlier.

One or more of USDA's food donation programs, carried out through State and local governments, operated in all 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific during the first 9 months of

Cottonseeds are said to have been planted first in Florida in 1556

fiscal 1968. Needy families in parts of 47 States, 3 territories and 25 Indian reservations, got USDA-donated food during that period.

The U.S. Department of Agriculture acquires food, suitably processed and packaged, and ships it to the States and territories for use in their school lunch, needy family, and other food-aid programs. Any donated food in these distribution channels may be diverted for immediate use to aid victims of natural disasters.

HAND REELS

Many people have stated, "Yard-Man Hand Reels are so quiet, it's hard to believe I am actually cutting my lawn."

If you doubt this, the one sure way to find out is to try it! When you do, you'll get another worthwhile surprise — 'Silent' Yard-Man Hand Reels are also the easiest pushing mowers in the world! The operation is silent and without effort—the blades cut like scissors, smooth and clean. Hand operated Fast Set Wheel and Roller Adjustments always maintain the correct cutting plane.

A little effort with a Yard-Man goes a long way towards a beautiful lawn.

Yard-Man also has a 6" or 8" Trimmer that operates the same way.

We specialize in sharpening silent type mowers.

500 DOZEN EGGS PER TON

with new Ful-O-Pep "500" Egg Feeds

Modern computers have determined that the most profitable egg feed in terms of lowest feed cost per dozen is one which produces a dozen eggs on 4 lbs. of feed—equivalent to 500 dozen eggs per ton.

New Ful-O-Pep "500" Egg Feeds, for floor or cage, are designed to give you 500 dozen eggs per ton on a year-around basis, under good environmental conditions. If you are a good manager, Ful-O-Pep 500 is made for you.

What would 500 dozen eggs per ton do for your profit column?
