Ladies, Have You Heard?...

By Doris Thomas, Extension Home Economist

Reduce Food Costs Yet Retain Food Value

Use government grades whenever possible. They assure you of quality food and are a good basis for price comparison.

Consider family likes and dislikes when you plan menus. Thrifty food buys are thrifty only if your family eats and enjoys the food. Limit your purchase of perishable foods to the amounts you can use while they are in top quality.

Choose the type of pack or grade in a canned product according to the way you plan to use it.

Compare costs, read labels, and buy food in the form that gives the most savings for the money.

Serve Kabobs At Outdoor Meals

Kabobs are pieces of highly seasoned meat and other foods roasted on a skewer.

You can use long, thin sticks of green wood with sharpened ends or buy metal skewers.

Cut meat for kabobs into cubes 1 to 2 inches thick.

Marinate meat for 3 hours or longer in a well seasoned sauce of your choice.

Then alternate the meat, vegetables and other foods.

Two important things when borrowing money

You need a sharp pencil plus the specialized financial advice of Farm Credit to determine how your financial needs can best be served. Farm production must be maintained, even increased if possible. Providing the financing to insure this is Farm Credit's job. Farm Credit loans are available now for any sound farm need. And, at realistic rates. Farm Credit interest is based on the unpaid balance of the loan. That saves you money.
