

Imitation Orange Juice Crack Down

HARRISBURG — Imitation orange juice and other so-called orange products are being sold for the real thing in some eating places in Pennsylvania, the

State Department of Agriculture has announced.

State Agriculture Secretary Leland H. Bull said the illegal practice was spotted by Department food inspectors who received substitutes although orange juice was listed on the menus

Secretary Bull said listing orange juice on menus and then furnishing a substitute is a violation of the state's food laws. He instructed inspectors to crack down on violators.

Fresh orange juice, packaged orange juice and frozen orange juice concentrate reconstituted with water are considered bona fide orange juice, Bull said.

"Davy Jones' Locker"
The term, "Davy Jones' locker", is used to mean the grave of those who die at sea. Davy Jones is a term for the spirit of the sea, usually an evil spirit.

Blight's out

There's only one sure way to fight blight. Keep your potato plants covered with an effective fungicide. A protective coating that will prevent blight spores from germinating and entering the plant.

DIFOLATAN 80 Wettable has shown, in test after test, that it can do the job. Excellent protection against both early and late blight. Particularly effective against tuber rot.

DIFOLATAN sticks and stays on the plant, resists weathering from rain or sprinkler irrigation. That means you can maintain your schedule of applications, without worrying about weather or irrigation schedules.

Made with its own wetting agent, so you don't have to add a spreader-sticker in the spray tank. Relatively low hazard to livestock and humans, and since there is no residue in the harvested potato crop you can use it right up to harvest without concern over residues.

Protection against tuber rot is outstanding. When you put potatoes in storage, you'll never know how well you did in the blight fight until you've shipped the last of them. Fields may look reasonably healthy before harvest, but if you put infected tubers into storage, you can find yourself with a costly, heavy cull out of late blight tuber rot infection.

DIFOLATAN works to give you greater yields of healthy potatoes. And bigger, healthier profits. When you fight blight the right way, everything is brighter.
