

AVERAGE MONTHLY WEATHER OUTLOOK

Weather Bureau Extended Forecast Division
FOR OCTOBER 1968

PRECIPITATION is expected to be subnormal over most of the Nation except for near normal amounts in the Great Lakes Region, the northwest Pacific coast, and the Gulf and South Atlantic states, with heavier amounts in Florida.

TEMPERATURES are expected to average below seasonal normals over most of the Nation except for above normal temperatures in the Pacific coast states and near normal temperatures over the northern third of the country between the Rockies and the eastern Great Lakes

GET THE BIG WIDE MONEY SAVER:

Solid Kaiser Aluminum Diamond-Rib® roofing and siding.

Diamond-Rib roofing saves you money when compared with other roofing materials. It gives you . . .

- more coverage per square purchased
- labor savings because you handle fewer sheets
- fewer laps, tighter roof
- buildings up to 15° cooler in summer—warmer in winter
- comfortable, more productive livestock
- solid rustfree metal that can't lose a protective coating—it protects without painting
- the only roofing sheet with two big guarantees!

HAIL GUARANTEE

Kaiser Aluminum Diamond-Rib roofing and siding is guaranteed for 15 years not to leak as a result of perforation by hail. No other damage is covered under this guarantee. Limited to replacement of material only. Not prorated. Not transferable.

CORROSION GUARANTEE

Kaiser Aluminum roofing and siding is guaranteed not to leak from perforations caused by corrosion provided Kaiser Aluminum accessories are used in installation and roofing and siding are not in contact with dissimilar metals or ground. No other damage covered. Diamond-Rib guaranteed 30 years. Limited to replacement of roofing and siding only. Prorated after 10 years based on prices at time of adjustment. Guarantee application must be approved. Not transferable. Limited to farm or residence installations.

Smoke Can Cause An Itchy Problem

You can get poison oak or poison ivy irritation without ever touching the plant, says a University of Maryland horticulturist.

Smoke from burning poison ivy and poison oak is even more dangerous than the plant itself, says Francis R. Goun.

Poisonous oils produced by the plant go up in the smoke.

if the smoke comes in contact with the skin or is inhaled—even by a person who is resistant—he or she is almost certain to suffer some irritation. The poisonous oils are much more active in the gaseous form than they are in the liquid form.

Stems, roots and berries as well as leaves carry the poisonous oils so you should take care in disposing of those parts as well. The leaves are dangerous even after they have changed

color, fallen to the ground and begun to rot.

If you have poison ivy and want to get rid of it, Goun advises first killing it with a herbicide. Handling with gloves, buy the larger pieces. Rake up leaves and bury them or put them on the bottom of your compost pile. But Don't Burn Them!

If you know the answer, please don't ask me the question

2,788 lbs. of pork to market from one litter in 156 days

That's the performance story of a litter of 13 pigs raised at Ful-O-Pep Research Farm. You can probably match or top this record by following the precision, maximum efficiency Ful-O-Pep program on your farm.

Ful-O-Pep proving ground
Here's how the 13-pig litter progressed. Litter was weaned at 3 weeks. At 4 weeks the pigs averaged 23 lbs each. Weighed again at 58 days of age, they averaged 50 lbs. At 156 days of age they topped the market averaging 215 lbs per pig for a total of 2,788 lbs. Good hogmen and swine nutritionists know that such fast growth is necessary for maximum feed efficiency and profits.

Maximum efficiency feeding program
Ful-O-Pep research has both the maximum efficiency feeds and feeding recommendations hogmen need these days for top profits. Here's the normal weaning plan:

- 6th day to 3 wks use 3 lbs Ful-O-Pep Gro Pig Pre-Starter per head.
 - 3 wks to 6 wks use 12 to 15 lbs. of Gro Pig Starter Bracer per pig.
 - 6 wks to 10 wks feed 50 to 60 lbs Gro Pig Grower per head.
 - 10 wks to market use Gro Pork 280 and figure 270 to 290 lbs feed per 100 lbs. of gain.
- For early weaning, the Gro Pig Pre-Starter is fed longer, from 6th

day until pigs consume 10 lbs. each then continue them on the feeding program above. Finishing on Gro Pork 280 has often produced gains of 2.1 lbs per head per day when fed to thirty pigs from 60 lbs on to marketing.

The precision of Ful-O-Pep programming gives pigs the right balance of nutrients when they need it. Ful-O-Pep aims to meet the absolute needs of pork producers who figure exact costs and profits from every phase of their operation.

Ful-O-Pep feeder reports 2.35 conversion
One Iowa hogman tested the Ful-O-Pep program on a lot of 62 pigs. His detailed records show a feed conversion for the entire program from birth to market of only 2.35 lbs feed per pound of gain. You may do even better—and collect a \$5 dividend for trying these fine hog feeds.
