Precautions To Take To Protect Children From Fire

Keep young children in constant sight and mind. Never leave children alone not even for a few minutes.

Be sure babysitters have specific instructions in case of a fire. Instructions include orders to get children outside the instant they discover smoke or gas and how to get in touch with parents fire department, physician, and police. Be sure babysitters know the location of at least two escape routes. Teach older children how to use and respect fire. They learn best by your example.

Keep your house free of fire hazards — have regular inspections.

Have at least two escape routes from every room and make sure children know these routes. Teach them how to get out of the house to safety in case of a fire.
