Forage Crops

Many calls are coming to our office regarding the use of forage crops after frost. The use of these frozen crops varies but the ones to be cautious of are the sudan grass and the sorghum-sudan hybrids. Most all other grasses, small grains, and legumes are safe to use after frost without danger of poisoning. The safest to permit grazing of green-chopping would be the permanent grasses such as bluegrass and orchardgrass; these may be consumed at any time with little danger of bloating, the legumes such as alfalfa and clover may be grazed or green-chopped after frost but should be allowed to dry off, consuming these materials while the frost is on the plant or while the plant is wet, increases the danger of bloating. The sudan grass and sorghum hybrids should not be used in the fresh condition for at least a week after a killing frost, and any new growth following a stunting frost could be

Servicemen To Receive Gift Parcels Via US Cargo Ship

Tons of St Nick's gifts will be going to members of the Armed Forces in Vietnam by special ship this year, thanks to a joint Pentagon-Post Office venture.

A fast US cargo ship will be designated the "1968 Santa Claus Special," sailing from Oakland, Calif., next month with Christmas parcels.

To meet the sailing deadline and assure pre-holiday delivery of gifts sent with surface postage, items should be mailed as soon as possible and not later than November 9.

They should be marked "Santa Claus Special" just below the stamps.

The "Santa Claus Special" will sail during the latter half of November and stop at Da Nang, Qui Nhon, Cam Rahn Bay and Saigon, Vietnam. It takes approximately three weeks for a fast ship to cross the ocean.

All gifts should be packed in strong containers with adequate cushioning and correctly addressed, including APO and FPO numbers.

There are several options available for mailing to the military which can save money. Post offices across the nation have free pamphlets available.

Sleek, Strong - Boned

on New FORMula Wayne Calf Starter

Here's an ideal creep feed! New FORM—new FORMULA! Special new texture and formulation gets calves on dry feed early. Fortified with an antibiotic, vitamins, minerals and proteins, new FORMula Wayne Calf Starter grows sleek, bright-eyed, strong-boned calves.

New FORMula Wayne Calf Starter

- Coarse, Uniform Texture Calves Like
- 10.6% Faster Gain — 14% Less Feed*
- No Growth Lag After Weaning
- Antibiotic Fortification Helps Prevent Scours
- Tastier — Gets Calves On Dry Feed Earlier

*In Research Farm tests compared to previous feeds.

FEED CATTLE FASTER AND MORE EFFICIENTLY THAN EVER BEFORE!

NOW! Feed up to 200' of bunk per drive . . . Feed multiple lots . . . Blend complete rations with . . .

VAN DALE'S NEW AUTOMATIC MULTI-FEEDERS

From the pioneer in silo unloading, come two low-power, mammoth capacity, bunk feeders for in-the-barn or feedlot feeding. You can feed from more than one silo (at the same time). Feed out to from one to four-or-more lots. Feed any material with big 9" or 12" true, bearing-suspended augers, (no metal-to-metal contact.) Feed entire bunk at one time; eliminate crowding.

High capacity and dependability . . . call us and we'll come out to see you, at your convenience.
