

**AVERAGE MONTHLY WEATHER OUTLOOK**

Weather Bureau Extended Forecast Division

**FOR MID-NOVEMBER TO MID-DECEMBER 1968**

**PRECIPITATION** is predicted to exceed normal over the western third and eastern fourth of the Nation with about normal amounts in between. Owing to the low temperatures predicted, some of the precipitation over the northern half of the country and especially at higher elevations in the west, is expected to be in the form of snow.

**TEMPERATURES** are expected to average below seasonal normals over most of the Nation except for near normal averages in the Great Lakes Region and coastal areas of the middle and north Atlantic states. The coldest areas relative to normal are indicated as the Southern Plains and the Gulf Coast

## JOHN DEERE 70 SPREADER

**Its specialty is hard-to-haul, semi-liquid manure**

Hauling beddingless, high-moisture manure from paved barnyards and feeding areas can be a real headache. Not so with a sturdy side-unloading John Deere PTO-driven 70 Flail Spreader.

Leak-proof tank-type construction of the new 70 prevents soupy stuff from running out before you get to the field. Stop in soon. We have dependable John Deere conventional spreaders, too.
