

**Call For Restraint
In 1969 Turkey Prod.**

Representatives of the nation's turkey industry — meeting in Washington with U.S. Department of Agriculture officials — called for turkey producers to hold production in 1969 to the level of 1968.

The 26 representatives, a cross-section of turkey producers and processors met with officials in USDA's Consumer and Marketing Service to discuss preparation of USDA's Consumer and Marketing Service to discuss preparation of USDA's 1969 turkey marketing guide. This economic guide is published annually to give turkey producers voluntary guidelines on the year's production.

The group emphasized that an increase in next year's production would result in lower prices to producers and to many birds carried over in storage. They recommended to the nation's turkey growers that production next year be maintained at the 1968 level.

C&MS poultry officials told the group that demand for turkeys in 1969 will be only slightly higher than in 1968, in the face of expected larger supplies of red meat and broilers. Storage stocks of turkeys on Jan 1 will also be larger than expected because consumption in the past few months was below the level of the past two years.

They also pointed out that the turkey breeder flock will probably be only slightly smaller Jan 1 than a year earlier. But a considerably smaller breeder flock (up to 9 percent smaller) could produce as many poult next year as in 1968, if the flock were used to its full potential.

The industry group expressed concern that favorable feed prices and recent small increase in turkey prices over low levels a year earlier might lead growers to produce too many turkeys. They asked USDA to bring these facts to the attention of the industry as soon as possible by issuing the 1969 tur-

search." But, he said, the latest claims and pronouncements are

key marketing guide. They also suggested that USDA update the guide periodically throughout the season to keep producers acquainted with new data as it becomes available.

"... beyond acceptance, and will lead to even greater confusion in both the public and professional medical minds."

"It's neither our place nor desire to defend an agency of the government," Stroud said. "But we'll certainly defend the rational and scientific position that has been taken by the FDA for which the heart people criticize them. The FDA's position has been based on recommendations of the renowned Food and Nu-

trition Board of the National Research Council of the American Academy of Sciences," Stroud said.

"And we want very much to be able to renew our disappearing respect for certain views of

the AHA," Stroud said. "Except for this peculiar position on diet, it's my personal view that most of the AHA's work in heart disease research and discovery has been of inestimable value to medicine."

**DISTRIBUTOR FOR
LISTER DIESELS
SALES - PARTS - SERVICE**

We sell from 3 1-2 K. W. to 100 K. W. Generator Sets.

Lister Diesels can be mounted on various pieces of equipment.

FREE ESTIMATES ON SET-UPS

Such as: Irrigation, Refrigeration, Electric Generating Plants, etc.

PIONEER OF BETTER IDEAS IN SILO UNLOADING

A 2-foot diameter impeller isn't the only reason you'll feed cattle faster with a Van Dale silo unloader

HERE'S ANOTHER...

... pioneered by Van Dale back in 1957... the heftier cast iron swinging V-paddles. They give the impeller more unloading capacity. Each 6 lb. V-paddle is weighed, matched, and balanced, then pre-run for more dependable performance. And then there's the solid-weld construction of the heavier gauge impeller housing for longer life in the silo... and the biggest impeller throat... and there are many more reasons that contribute to Van Dale's superior capacity and reliability in addition to the impeller... like the double augers and the... But why not let us tell you about them. We'll be happy to drop by to see you at your convenience.

**METAL ROOFING
by
FABRAL**

THE MOST COMPLETE METAL ROOFING LINE AVAILABLE ANYWHERE!

- Aluminum
- Galvanized Steel
- Factory Painted Aluminum
- Factory Painted Galvanized Steel
- Long Lengths - up to 40'
- Customer Lengths - You name the length

Now Fabral Metal Roofing is available in your area. For the first time you can specify the configuration, (choice of 7 available), and type of metal (aluminum, galvanized steel, factory painted aluminum, factory painted galvanized steel - even stainless steel). You can even specify the EXACT CUSTOM LENGTH (up to 40' long)

tailored to YOUR job in most of these designs. In most cases, one piece of metal roofing will run from the peak of the roof down to the eave. No end laps to cause leakage - fewer sheets - less cutting and fitting on the job. The Fabral program saves on-site labor and gives you a neater, stronger and better building.

There are Fabral metal roofing sheets designed to fit your requirements for farm, industrial, commercial, utility and general purpose structures. Whether you are building a new structure or recovering an old one, you owe it to yourself to find out about Fabral Metal Roofing - the most complete line available - ANYWHERE!
