

AGWAY

AGWAY SET UP A \$10 MILLION SYSTEM TO SERVE YOU

Right in the heart of the East's natural-gas country, Agway set up a huge new plant to manufacture nitrogen products from ammonia at Olean, N.Y. Here are produced not only Nitran but prilled urea, as well. A fleet that includes 130 modern tank cars hauls the Nitran output of this plant over a network of Eastern railroads to more than 150 different distribution points in Agwayland. The special Agway Model 300 Nitrogen Applicator delivers direct to your farm and applies Nitran on your fields at less cost than you could do it yourself.

Nitran is Agway's solution nitrogen. Nitran is your least-cost source of vital early-spring plant growth when ground temperatures are still too cold for growth-producing bacteria to activate themselves. And because Nitran contains three different sources of nitrogen, it continues to boost plant growth well into the growing season.

Agway engineered and built a precision solution-nitrogen applicator to assure farmers of uniform and accurate application. It enables Agway to apply Nitran on your fields cheaper than you can buy and apply any form of nitrogen yourself.

**Just order your
NITROGEN &
Leave the application to Agway!**

**Costs less than
doing it yourself**
