Manheim FFA Holds Banquet

The Manheim Future Farmers of America Parent and Son banquet was held last Friday evening at the High School and featured the presentation of chapter degrees, honorary degrees, citation awards and project and contest recognition.

Two local farmers were made Honorary Chapter members. They are Clarence Keener, Jr., Manheim R1 and Mark Nestle, Manheim R3. And for the first year, citation awards were presented to companies who helped the chapter in various

ways. The Landis Bros., Inc., Lancaster, citation was accepted by Jay Lloyd Barge and the Agway Inc. Feed, Manheim, citation was accepted by Howard Swan.

President of the State Association, Dale Hoover, Lebanon County, was the featured guest. Hoover told the members, parents and guests present that wearing the FFA jacket makes you stand out in a crowd. "Be a gentleman when you wear it," he said, "for you are representing the FFA. Be the best of

what you are and no one can ask for anymore," he concluded.

Mark A. Campbell, Vo-Ag teacher, named the Chapter Farmer Degree winners as follows: Star Red Rose Farmer, Burnell Buchen; Star Chapter Farmer, Gerald Wolfe; and Star Green Hand, Joseph Lefever.

In other awards, Jesse R. Erway, Vo-Ag Teacher, named

these top winners: Lester Heistand, Mechanics; Gerald Nissley, Livestock; Wilbur Groff, Crop Farming; and Nelson Wagner, Dairy.

Top in the Seed Sales Contest were three freshmen boys: Kenneth Groff with \$806 sold, Mai-

lin Becker, \$514 sold and Amos Sauder, \$450 sold. These boys received FFA jackets or the equivalent merchandise.

Sears Gilt winners were named. They are Irvin Boll, Jerry Hershey and Joe Lefever. Gerald Nissley, presided.

Technology's Progress

Although it did not advance rapidly, technology made substantial progress in the Middle Ages. The windmill, wheelbarrow, window glass, candle and paved road were invented in the 12th century, spectacles and the ship's rudder appeared in the 13th, the grandfather clock was devised in the 14th.

Michigan has produced well over 10 billion pounds of copper in the past century.

Where
will your
fertilizer be
... come
summer?

ORTHO

Will it be where the plants need it most?

Probably not, if you apply conventional fertilizer this spring. Come summer, the critical supply may be left "high and dry."

During the heat of summer, roots are most active down in the deeper zones where the moisture supply is more abundant. Trouble is, that may not be where the food is.

Phosphate, for example, loses much of its effectiveness by becoming locked up through fixation in the soil.

But UNIPELS contain two forms of phosphorus (as well as potash and two forms of nitrogen) for continuous plant feeding throughout the growing season.

A unique "phospho-nitric" process makes the phosphate in UNIPELS 100% available, yet makes it resist fixation regardless of how it is applied.

Come summer, the phosphorus and other nutrients in UNIPELS are down in the rich moisture zone actually stimulating root growth and proliferation for greater nutrient intake.

Make sure your fertilizer is where the plants need it most this summer — plowdown UNIPELS this spring. Visit us soon.
