Ortho Unipel STARTER SPECIAL

A starter? As a "pop-up"? It has to be special. It is STARTER SPECIAL is a completely unique product. Here's why:

— Physical Uniformity STARTER SPECIAL pellets are made to the same shape and density for maximum consistency and control in application

— Chemical Uniformity Each and every STARTER SPECIAL pellet has all three primary nutrients — nitrogen, phosphorus, potassium — chemically homogenized in precisely the most desirable ratio 13-34-10. The nutrients can't separate or segregate during handling as with troublesome, hard-to-regulate dry blends.

— Double Duty Nutrients STARTER SPECIAL has both quick-acting and long-lasting nitrogen and phosphorus for thorough plant feeding. There is no urea or diammonium phosphate that might endanger the seed through liberation of free ammonia.

Of course, these features also make it highly effective as a banded starter. But, with only slight adaptation of most planters, it can be applied directly with the seed in exacting measurement for safety and maximum response.

With this kind of control, you apply much less material — only 1/3 the amount needed for banding. And the reduced material handling could cut your planting time in half!

So save time, trouble, and money at planting time. See us soon about applying STARTER SPECIAL this spring as a dry pop-up.

NEW INTERNATIONAL

PERFORMANCE-RATED

400'S

Field proven in every crop

What do you want in your next baler — simplicity in operation? Because here are the ones that are easy to get ready, easy to keep going. That have fewer and simpler adjustments than any other baler.

Dependability? You'll take a 400 for granted as it turns out thousands of bales without a miss. It's built right to bale right and stay right.

Versatility? Tested in every type of crop in every part of the country, you can rest assured a 400 will handle anything you've got to bale.

Capacity? Up to 15, 17, or 19 tons per hour capacity. The unmatched capacity you need to handle many crops in many conditions.

Don't wait until your baler drops dead. Check on a new 400 now. Ask about the new replaceable Swedish steel twine knife, the tungsten carbide shearing knives, the rubber mounted pickup teeth and other 400 firsts.
