

Meat In Philadelphia Seized

A 7,489-pound shipment of Department of Agriculture inspected beef in Philadelphia, Pa., was seizes and ordered destroyed through action by the U. S. District Court for the Eastern District of Pennsylvania, the U. S.

reaching consumers, since the beef had moved across State lines without being Federally inspected. The court, on March 19, ordered the U. S. Marshal to destroy the product.

The action involved 6,788 pounds of beef ribs, and 701 pounds of boneless beef knuckles

shipped in June 1968 by Emil A. Kaufman, Inc., 1208 E. Broad St., Elizabeth, N. J., to Kaplan Prime Meats, Inc., 982-88 North Delaware Ave., Philadelphia, Pa. The meat had been processed without Federal inspection.

Labels on some of the product showed official inspection marks—an additional violation of the law.

Federal inspection is required of all animals before and after slaughter and during all steps of processing, if meat is to be shipped across State lines or in foreign commerce.

USDA detained the product following its shipment, and referred the case to the U. S. Attorney. The U. S. Attorney filed a complaint with the Federal court against Emil A. Kaufman, Inc., and ordered the meat seized by the U. S. Marshal. The corporation did not answer the complaint, and on March 19, 1968, the court entered a default judgment against the corporation and ordered the product destroyed.

Shepardson Completes Cattle Systems School

Harry E. Shepardson III of Landisville, Pa., representing his employer, L. H. Brubaker, Inc., Lancaster, Pa., recently attended a special school on Cattle Feeding Systems Planning offered by Starline, Inc., Harvard, Illinois, leading manufacturer of quality farmstead equipment since 1883.

A two-day course of instruction was held on March 24-25 at the Eastern Branch Office, Albany, New York. Methods were taught for determining a prospect's livestock farming objectives, inventorying his current assets and future needs and developing detailed feeding systems plans to help him reach his goals. All modern automated feeding methods and types of animal housing were thoroughly covered.

Increased agricultural competition and farm labor shortages have led to the development of the Starline automated systems which enable modern farmers to handle larger herds with less work for bigger profits.

An old-timer is a fellow who can recall when a budget was balanced rather than juggled.

COMPARE AT CASHWAY

We stock quality name brand materials. It is not necessary to wait for a "sale" to receive a good value at CASHWAY. Our prices are low... everyday... the year around.
