

**Pick a John Deere
38 h.p. 1020
for cultivating,
get this bonus...**

**"Live" PTO power for
baling... with low-built
stability to hug the slopes**

Up to 24 inches of clearance make the "1020" an A-1 choice for 2- and 4-row cultivating. Over and above that clearance, though, the "1020" is a perfectly styled haying tractor—with 4-wheel stability and low center of gravity. Available with exclusive "live" mid-point PTO for mower-power... and dual-speed rear PTO for conditioner or baler. One low step gets you on and off a "1020" easily. Be our guest for a field test of this lowest-priced tractor in The Long Green Line. Credit? Yes.

Modernization Projects Not Always Profitable

A complete remodeling project is neither necessary, practical nor economical for most poultrymen, according to a new "Poultry Handbook," published by The Pennsylvania State University College of Agriculture.

"The poultryman needs to make an estimate, preferably

on a per dozen-eggs-produced basis of the annual costs involved in new housing and equipment, said Dr. Floyd W. Hicks, Penn State Extension poultry specialist, one of the publication's authors. "He should then compare these costs to remodeling costs and returns," the specialist added.

Shared Holiday In Need Of Host Families

Will you open your heart and home to help a Lancaster County child?

Shared Holiday is a program whereby underprivileged children are given a chance to spend a two-week vacation with a host family, joining in the day-to-day routine and family life.

Shared Holiday was created in 1965, and through many hours of volunteer help, has grown until in 1968 300 children were referred to our committee for placement. Because of the limited number of host families, only 20 of these children were able to be placed in homes of host families.

All children who are referred to Shared Holiday are considered equally, with no distinction made according to race, religion, or nationality. Host families may express a preference as to age and sex of the child they will invite. Children receive medical exams before placement, and are covered by accident insurance.

One of the advantages of a two-week program is that bonds of affection and understanding, and a natural family feeling can be established with the child. Host families are encouraged to continue their relationship with the children and family if they so desire following their initial placement period.

Dates for Shared Holiday vacations this year are: 1st period: June 30 to July 12; second period: July 14 to July 26; 3rd period: July 28 to August 9. Applications may be obtained from the YWCA office or the Lancaster County Council of Churches office.

Here is a chance to help a child. Don't say, "Maybe we'll do it next year." Do it THIS year.

The problem of investing in modern poultry housing and equipment is an industrial problem, the poultry specialist points out. Piecemeal modernization beginning with adding insulation and ventilation and then moving into mechanization appears to be practical for very few poultrymen, however, he adds.

"Keeping capital costs, especially charges for using capital, under tight control will be increasingly important with lower net profit margins in Pennsylvania," Dr. Hicks emphasized.

The publication, which contains the most up-to-date information on housing and equipment considerations found anywhere in the United States, may be purchased for \$150 plus 6 percent Pennsylvania sales tax. Make check or money order payable to The Pennsylvania State University and send with your name and address to POULTRY HANDBOOK, Box 6000, University Park, Pa. 16802.

The volume also contains sections on incubation, brooding, pullet rearing, table egg production, engineering, business management, marketing and processing, and broiler and turkey production.

Has Many Bridges

Leningrad, second largest city in the Soviet Union, was known as St. Petersburg until 1914, then Petrograd until 1924. It resembles Venice with its more than 360 bridges criss-crossing the branches and canals of the Neva River.

Postal Rate Increases

An "inherited" postal deficit of \$12 billion is responsible for the proposals to raise the postage bill county residents.

Postmaster General Winton M. Blount in Washington, D. C. that the record \$12 billion 1970 deficit compelled President Nixon to seek postage rate increases. Without higher rates the Department will be left with a staggering deficit that would become an added public tax burden.

In addition to increasing letter mail from 6 to 7 cents, as proposed by the Johnson Administration, President Nixon also asked that second and third class mailers help reduce the large postal deficit which would otherwise be paid by taxpayers, the postmaster said.

For bulk third-class mail and most magazines and newspapers, the rates would be increased 16 percent to 20 percent above today's levels, he noted. These percentages include rate hikes already scheduled by previous action of Congress.

The President's recommended increases will reduce the 1970 postal deficit by more than \$600 million.

The postmaster listed these other details on the proposed increases:

First-class mail: Letters and post cards would be increased one cent, to 7 cents an ounce and 6 cents a piece, respectively, on July 1, 1969. Airmail postage would remain at 10 cents. This will yield \$557.2 million in new revenues.

Second-class mail: A handling charge of 3/10ths of a cent per piece for circulation outside home counties would become effective July 1, 1970. This would yield \$153 million annually and would represent a 12 percent increase in addition to the 8 percent rise scheduled to take effect January 1, 1970.

Third-class mail: For single pieces, rates would be increased one cent per piece. This would yield \$12.4 million. For regular bulk third-class, the minimum would be increased to a uniform rate of 4.2 cents January 1, 1970, as contrasted with the present rate of 3.6 cents. The 1970 increase would lift revenues by \$46.8 million annually.
