Until 1847, the person receiving letters paid the postage — not the sender and the rate up to 150 miles was 21 cents per sheet.

There are few things more uncommon than common sense.

**Agricultural Image**  
We often hear the comment on how attractive and well kept we find our Lancaster County farms. This is very important in today's growing society because a good image of agriculture helps to attract and satisfy the consumer. Clean barnyards, clean animals, and well kept farmsteads are an asset to any farm operation and create a better appetite for food products from all potential consumers.

Local farmers are urged to continue this wonderful practice as a means of advertising their farm products. Attractive farms help to impress upon all citizens the high quality of food products now being produced on our farms.
