

Agrindustry Careers Set For FFA Week

Exhibits and discussions of occupational opportunities in agricultural industry will be a new feature of the annual Future Farmers of America Activities Week July 1 to 3 at The Pennsylvania State University. Attracting some 1,400 FFA members and teachers, the event will include the annual business meeting of the State FFA Association.

By including presentations of state and federal agencies and

a commercial industry, the training will give a broad look at the total concept of agriculture, states Norman K. Hoover, in charge of arrangements for the department of agricultural education at Penn State.

Interested students will be invited to meet with representatives of the U. S. Soil Conservation Service, the Pennsylvania Department of Agriculture, the State Game Commission, the Pennsylvania Department of Forests and Waters, and the New Holland Machine Company. Another group of agencies and commercial industries will be presented next year, Dr. Hoover points out. Tours and demonstrations by plant and animal science personnel in the College of Agriculture will be featured as in previous years.

Eighteen state FFA contests will be featured this year, three more than any previous year. The new contests deal with floriculture, farm machinery adjustment and power, and operation of the small gasoline engine.

DIFOLATAN[®] 4 FLOWABLE

NEW LIQUID FUNGICIDE SHIELDS POTATOES FROM EARLY & LATE BLIGHT

Persistent Protection You Can See. DIFOLATAN coats each leaf with a visible shield of protection against blight spores.

Controls Early and Late Blight . . . Tuber Rot As Well. A regular DIFOLATAN program of prevention defends against threat of yield losses from blights and tuber rot.

Complete Program Compatibility. Build your entire pesticide program around DIFOLATAN. It's compatible with almost all potato pesticides.

Won't Clog Nozzles. No gritty particles to clog nozzles, cause skips, slow you down.

Sticks to Leaves . . . Even Under Sprinkler Irrigation. Superior built-in sticking qualities give up to 10 days protection from each application.

Right For Low Gallonage Application. Requires less water than wettable powders. Fewer fills, better coverage, ideal for aerial or ground application.

"If the increase in consumer income slows as expected later in the year," USDA added, "less

Mohnton, regional vice president of the FFA's North Atlantic Region, will speak at an assembly the night of July 2 in Schwab Auditorium. Weber is vice president for 12 northeastern states.

Films of Penn State's undefeated 1968 football season will be shown the night of July 1 at the opening assembly in Schwab Auditorium, presented by Sever J. Toretti, assistant director of athletics. A final assembly will be held July 3 at 10 a.m. in Schwab Auditorium to present awards.

growth in demand for broilers would occur. This would put prices in the second half under pressure if the expected increase in supplies of red meat and broilers materializes."

For turkeys, USDA said indications are for "moderately higher" prices than a year earlier during the main marketing season this year.

The report noted that turkey marketing during the first half of 1969 may turn out to be 10 to 12 pc. below last year.

This decline, coupled with a relatively large movement into consumption channels, has made cold storage holdings of turkey less of a price depressing factor, USDA said.

Stevens Mill Wins Contest

The management of Stevens Feed Mill, Inc., Stevens and Leola, Pa., recently won a tonnage contest conducted by Ful-O-Pep Feeds.

The award was for increased tonnage during a nine month period.

In Ful-O-Pep's opinion Stevens Feed Mill made a significant effort to expand their business, better merchandise their products and more efficiently service the growing needs of agribusiness in this area.

Stevens Feed Mill at Leola is celebrating their first anniversary at that location this month.
