

**Veteran Classifier
Appointed To ABS**

John H. Stewart has been appointed to the American Breeders Service, Inc. Dairy Cattle Breeding Staff. His primary duties will be with the Genetic Mating Service. The appointment was announced by W. Kenneth Young, Director, Dairy Cattle Breeding Program for ABS, a subsidiary of W. R. Grace & Co. Stewart will work primarily in the western United States, with periodic assignments in Latin America.

Prior to his ABS appointment, Mr. Stewart was employed by the Holstein-Friesian Association of America for 24

years, first as a fieldman and then as classifier. Stewart is credited with classifying over 100,000 cows and bulls. He has completed six trips to South America on judging and classifying assignments, taking him to such countries as Chile, Peru, and Colombia. Mr. Stewart has also had experience as a farm supervisor for Farm Home Administration and served in the capacities of herdsman and farm manager for the Iowa State Dairy farm, Ames, Iowa.

Stewart was born and reared on an Iowa dairy farm. He is a Dairy Husbandry graduate of Iowa State University at Ames, Iowa, and has been associated

John H. Stewart

with registered Holstein cattle all of his life.

Stewart is very active in outdoor activities and, in 1935, made a 2,700-mile canoe trip through northwest Canada to the Yukon River in Alaska. In addition to canoeing trips, Mr. Stewart enjoys skiing, hunting, fishing, and golfing. He is a member of the Mason's Lodge and the Dairy Shrine Club.

Mr. Stewart and his wife, Irene, have four children. They reside at 7801 East 14th Avenue in Denver, Colorado 80020.

Alfalfa Growers

Alfalfa growers have already harvested their first cutting and the second crop is coming fast. In general, insect infestation was not as serious this year and alfalfa continues as queen of the forage crops. Most yields will be increased by an application of a phosphorus-potash fertilizer early in the fall or after the removal of the first crop. Also, for the good of the stand, one of the later cuttings should be allowed to develop into 60 to 75% bloom. Proper management lengthens the life of the alfalfa stand.

YOUR SAVINGS GAVE HIM HIS JOB

That's why the money you place in our care is so important to the community. It furnishes the payrolls, buys the lumber and materials that go into a new home or improve an old one. Few industries stimulate business and promote prosperity like construction.

The dollar you save at home works at home, helps keep our town a good place in which to live and raise a family. We invite your savings.
