

Almost 100,000 pedestrians were killed or injured af intersections in 1968.

## State Grange Denounces Bill

The Pennsylvania State Grange recently denounced House bill 469, now on third reading in that body, and called
for its defeat. The bill would for its defeat. The bill would give the State Department of
Highways power to condemn land in fee simple absolute up to six years in advance of actual need.
A. Wayne Readinger, state master of the Grange, charged this "could cause unwarranted harm to hundred of land owners throughout the commonwealth especially farmers and others in rural areas."
Many farmers, he said "would be forced out of business. They would have to relocate perhaps in strange com munities or seek other employment, and possibly at great social and economic sacrifice. To them that could amount to major distress."

Readınger added that "if this bull should pass and become law it would destroy one of the fundamental rights of an American citizen - the right to hold his ploperty against serzure by the state until public need for that propelty has been proven
"The bill would set up the Secretaly of Highways in the real estate business on an un limited scale Property owners would be at his mercy Agricul ture would suffer as would whole communities along with upı ooted farm famılies.'
Although admitting a need for additional land for new highways, Readınger pıotested partıculaily against provisions in the bill for "giving unlimited autholity to the Secretany of Highways for wholesale acquisition of land in fee simple, and before need for the land had been demonstrated, if ever.
In case land so seized but not used for highways were to be re-sold by the Highway Depart ment pior owners would have first chance to buy it back at the price they were paid for 1 t . This provision, Readinger said, could be attractive in some in stances, but, generally, disrupted farm families who had re
located, meanwhile, would experience only added distress making a second relocation."

Now England Warned Of Brown Egg Surplus
"New England is rapidly becoming a surplus producing area," warned Frank Reed, Poul
try Economist. try Economist, University o Maine. "This is complicated still Enther by the fact that New England produces brown eggs
that are not readily accepted in that are not readily accepted in ther areas, Reed added A recent issue of the New Eng. letter further reported careful long range planning to careful tended periods of over.production, possibly coupled with size control with an early slaught er option, similar to that em ployed by Western Egg Company in Northern California.
Ray Delano, manager of NEE MA, devoted a portion of his newsletter to a summary pub "Red" Curtin the Boston Mar ket Reporter.
"While local supply and de mand factors were still some what out of balance, the over supply was not as selious as entlligent approach in divesting intelligent approach in divesting sizable lots of eggs into breaking
channels (after Easter) to avoid channels (aft we whole price structure, was of considerable tructure, was of considerable days the attitude was generally "lat the other guy make the sac fice." The awareness of producers that they have a collective cesponsibilty to control supplies esponsibility to control supplies mand and are actually doing something about it, is an innovation that the industry has never experienced and bodes well in

> New features and refinements increase leadership of John Deere 3020 and 4020 Tractors

Could they make them any better? Yes, John Deere engineers reworked the 70-h.p. 3020 and 94 -h.p. 4020 Tractors to increase operating economy and rellability. New pistons, new cylinder liners more tightly fastened, alternators, oil coolers across the board, a new 12 -vólt electric system evenly charged-these and other features add up to extra-value for your

week and $10 \%$ above the comweek and $18 \%$ above the comparable period a year earier. The current 3.week total of eggs set is $11 \%$ above the same per-
iod a year ago. Inshipments of broiler-type chicks during the past 10 weeks averaged $42,000-$ twice the comparable period a year ago. Outshipments averaged 328,000 during the past 10 weeks, $21 \%$ higher than a year earlier.

## Farmway

Power to spare, extra strength in eliminate the stresses that cause every component. New low-friction breakdowns. design. Farmway is built for the big barn.
Rugged drive unit. Three sizes one to fit the load-carrying power you need. The right-mated unitlopes long on the job. New low-friction curves and pocket tough pulls.
Husky chains. Like the strong optional nickel alloy, German made
chain. Gives you extra ( $54,000 \mathrm{Ibs}$. minmum breaktest) strength for trouble-free operation.
Less maintenance, Ionger life. Every component is engmeered to Think about that, then talk to your Farmway man. Affiliate of Berg Equipment
