

## Conservation Corner

Erosion is nothing to crow about.

**Soil Testing** The Penn State Soil Testing laboratory has gotten a real workout this year when 900 soil samples per day were processed during the rush season. The peak season was from the last week of March until the first of May. It is expected that 15,000 samples will be tested by the first of July. This high volume of work was expected and the lab was

tooled to test the samples with the quickest possible service. From the time a sample is received until the report is mailed, it takes from 7 to 10 days. When mail time is considered in getting the sample to and from the lab a 2-week period is utilized. Local farmers and gardeners are urged to allow this amount of time for the week before needing the information.

# HALT

Go no farther in search of the best 46 h.p. tractor. See us about a new 1520. Great features. Nice price, too.

### Electric Fence

We've often heard the discussion about the use of electric fence to control sheep. A recent experiment at the Ohio Experiment Station reveals that electric fence can be used successfully

and economically for sheep management. In these trials two 14-gauge wires were installed: the lower wire was 12 to 15 inches from the ground and the top wire one foot higher; the sheep learned to respect the fence and were controlled; the cost was less than other types of fencing usually used with sheep. Also, the double wire helped to keep stray dogs out of the sheep pasture. No doubt some local shepherds have already used several electric wires with success on their flocks.

## Pigs grow and grow...

when they are fed

### RED ROSE SWINE FEEDS

Use the complete line of RED ROSE SWINE FEEDS to raise your pigs. Farrowing Ration for full feeding to sows before and after farrowing; Pig & Sow Pellets meets exacting nutritional requirements during late gestation, lactation and early growth; Pre-Starter Pellets with sugar concentrates and high antibiotic levels for young pigs; Pig Starter Pellets to supplement the sow's milk; Pig Grower Pellets for pigs 50 to 100 lbs.; Porkmaker, a complete feed for pigs 100 lbs. to market; and Hog Supplement . . . for feeding with your grain.

Use these feeds and every one of your pigs will make money for you!
