"Man poisons me but lets erosion run wild!"

Use Proper Lawn Seed

It is important to use the proper seed if homeowners wish to establish good lawns, reminds John C. Harper, II, extension agronomist at The Pennsylvania State University. If there is any doubt about the kinds of seeds which should be used in varying

situations, contact your county agent for suggestions on desirable seed or seed mixtures. Lawns must be carefully planned if they are to be attractive.

Use Credit Profitably

Credit is not just for those who get in financial difficulty and find it necessary to borrow. A high percentage of business enterprises use credit as a means of conducting a profitable operation. Since the trend toward larger farm units involves a larger investment in land, livestock and equipment, many farmers are finding it profitable to use credit.

Unwise use of credit can be dangerous to both borrower and lender. But sound credit, which can be repaid from the operations of the business without involving too great a risk, has helped many farmers to get ahead.

Since there is a relatively narrow profit margin in most types of agriculture, good farmers plan their operations carefully, maintain records, and watch expenses closely. When they borrow, they see that the cost is not too great and that the funds are put to profitable use. — Farm Credit Service.

Promoted Preservation

Edward Everett, clergyman, statesman and one of the great U.S. orators, raised \$70,000 by lecturing on the character of George Washington, which sum went for the purchase and preservation of Mount Vernon as a national shrine.

Milk Pricing Altered In Delaware Valley

The U.S. Department of Agriculture announced an order amending the order regulating the handling of milk in the Delaware Valley Marketing Area.

This order by the U.S. Department of Agriculture modified the Class I Price to provide that such farm price for the month shall be \$7.17 (154 cents per quart), plus any amount by which the average price of manufactured milk in plants in Wisconsin and Minnesota exceeds \$4.33 per hundredweight.

The amended order would delete all of the language of the old Class I Pricing Formula of the order.

The amended order would also

provide monthly producer and handler butterfat differentials based on the average daily wholesale selling price of butter in the New York City market.

The amended order is a result of a public hearing held in New York City, New York, on June 16 and 17, 1969. The hearing was requested by the New York-New England Milk Coordinating Committee and supported by Pennsylvania Milk Producers Federation. Pennsylvania includes the 3100 members of Interstate Milk Producers Cooperative among its over 5000 dairy members.

Friendly

The Pawnee Indians never fought against the United States. Many Pawnees, in fact, acted as scouts for the country in its battles with other Indians.

Start raising more and better Calves the Easy NURS-ETTE way

No more carrying pails of warm water or hand mixing milk replacer. Just fill the hopper of the NURS-ETTE with milk replacer and the NURS-ETTE will mix milk replacer and warm water and keep it warm until calf nurses the mix (approx 14 oz.)

Then it will mix a fresh batch of water and replacer.

SAFE STORAGE!

The Butler trademark tells you so

Butler quality grain bins give you the safest, most dependable storage you can buy. They're pre-engineered that way by the men who know grain storage best. What's more, it's easy to convert a Butler bin into an on-farm drying system, if you decide to dry your own grain. Let us discuss your grain storage needs with you. Just give us a call or stop by.

NEW Purina Dairy Conditioner Special can prepare cows for good production at low cost

If you're not among the many good local dairymen who have started mixing NEW Purina Dairy Conditioner Special with your own grain to build a research-proved dry cow ration, it can pay you to check into this low-cost way of feeding dry cows.

New Purina Dairy Conditioner is a 16 percent protein ration, fortified with extra Vitamins A and D plus phosphorus to help guard against milk fever.

To help you save on dry cow feeding, Purina Research recommends varying feeding levels, depending on cow condition and the quality of your roughages. For example, if a cow is in good condition and your roughages are of excellent quality, you would feed less Purina dry cow ration than if the cow were in only fair condition and if the roughages were of only fair quality.

Using Purina Check-R-Mix* formulas we can build you a low-cost dry cow

*Reg. Trademark—Ralston Purina Co.

ration, combining New Purina Dairy Conditioner with your grain. Or, if you're feeding low-protein roughages, it may pay you to feed Dairy Conditioner "straight"—just as it comes from the bag.

More and more successful area dairymen are proving that good dry cow feeding pays off in extra cow condition—and extra milk production in the next lactation. For example, 100 to 200 pounds of additional body weight at freshening can pay off in 1,000 to 2,000 pounds of extra milk during the lactation.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to point out how new Purina Dairy Conditioner Special can help prepare your dry cows for good production at low cost.
